Agricultural Statistics of India

1920-21

VOLUME I—BRITISH INDIA

Introductory Note

This annual volume is the thirty-seventh of the series started in 1886 with statistics for 1884-85. As in the previous issue, figures for twenty years are shown in Summary table No. 1, for ten years in the provincial tables, and for two years in the district tables. A map showing the departure from the normal of sown area and that of rainfall in 1920-21 and other charts as detailed in the last paragraph of this note have, as usual, been incorporated in the volume. An additional chart illustrating fluctuations in harvest prices of principal crops has for the first time been prepared and inserted in the present issue.

The statistics are compiled from annual returns furnished by local authorities, namely, the Government of Bengal, the Board of Revenue, Madras, the Government of Bombay, the Government of Assam, the Chief Commissioner, Coorg, the Revenue Commissioner, North-West Frontier Province, the Commissioner, Ajmer-Merwara, the Commissioner of Settlements and Land Records, Burma, the Director of Agriculture, Bihar and Orissa, the Directors of Land Records, Central Provinces, the Punjab, and the United Provinces, the Deputy Commissioner, Delhi, and the Political Agent in the Southern States of Central India, Manipur. Detailed information as to the sources from which the figures are collected in the different provinces is given in footnotes to the respective tables for each province. The statistics now consist of seven separate tables, namely, I—Area; II—Classification of area; III—Area under irrigation; IV—Area under crops; V—Live-stock, ploughs, and carts; VI—Land Revenue assessment; and VII—Harvest prices. The totals of the figures given in these tables are shown in a series of summary tables, to which a table on world crops is added. In addition to these, there are three appendices, namely, Appendix A dealing with the average yield per acre of principal crops; Appendix B giving the meaning of vernacular terms used in the volume; and Appendix C containing an alphabetical list of crops cultivated in India and their classification in Table IV. This volume, it may be noted, deals with the agricultural statistics of British Provinces, while Volume II deals with those of Indian States* as far as they are reported.

The returns for each province relate to the following dates:—

Assam	Year ended 31st March
Central Provinces and Berar	„ 31st May
Bengal, Bihar and Orissa, United Provinces, * Madras, Burma, Bombay and Sind, Punjab, North-West Frontier Province, Ajmer- Merwara, Delhi, Coorg, and Manipur	„ 30th June

Periods to which
provincial returns
relate

It should be noted here that statistics relating to areas irrigated (Table III) and areas under crops and specification of crops (Table IV) generally include both the *kharif* and the *rabi* crops, and relate to the year ended with the harvesting of the *rabi* or spring crops.

* In Appendix A (Volume I), however, figures relating to Mysore are shown separately.

Area and
Population of India

The total area of India is 1,800,000 square miles, or 1,151,765,000 acres, with a population of 319 millions according to the census of 1921. This may be divided as follows :—

	Acres	Population
(1) British Provinces (including Indian States within the political jurisdiction of Local Governments and Administrations)	755,841,000	271,558,000
(2) Indian States having direct political relations with the Government of India	314,726,000	43,386,000
(3) Certain specially administered territories in Burma (the South Shan States and Karenne) and in the North-West Frontier Province (Tribal areas, etc.) not included under (1)	46,492,000	3,494,000
(4) British Baluchistan (including administered areas)	34,706,000	421,000
Total	1,151,765,000	318,859,000

No returns of agricultural statistics are prepared either for item (3) certain specially administered territories in Burma and in the North-West Frontier Province, or for item (4) British Baluchistan.

Table I
Area

The total area of the British Provinces (item 1 above) dealt with in this volume—755,841,000 acres or 1,181,000 square miles—includes 134,615,000 acres, with a population of some 27 millions, belonging to Indian States, which are within the political jurisdiction of Local Governments and Administrations. These include in Burma the Mòngmit State, the Hkamte Long State, the Upper Chindwin States, and the North Shan States; in Assam, Manipur and the Khasi and Jaintia Hill States; in Bengal, Cooch Bihar and Tripura; in Bihar and Orissa, the Tributary States of Orissa and Chota Nagpur; in the United Provinces, Rampur, Tehri, and Benares; in the Punjab, the Punjab Agency States, the Ambala Division States, and the Simla Hill States; in the North-West Frontier Province, the Phulera and Upper Tanawal States; in Sind, the Khairpur State; in Bombay, the Gujarat States (excluding Baroda), the Konkan States, the Deccan States, the Satara Jagirs, and the Southern Mahratta States; in the Central Provinces, the Chhattisgarh States; and in Madras, the States of Travancore, Cochin, Pudukkottai, Banganapalle, and Sandur. Of these States, agricultural statistics are prepared for most of the States in the Punjab and the United Provinces, all the States in Madras and a few States in Bombay; but they are dealt with in Volume II along with the States having direct political relations with the Government of India (item 2).

Thus, by deducting 134,615,000 acres belonging to Indian States from the total area of 755,841,000 acres included in British Provinces, the remainder, 621,226,000 acres, is shown in Table I, and this represents the area of British territory according to professional survey. The professional survey is that carried out by the Survey of India in Northern India, and by the corresponding departments in the Southern Presidencies. The agricultural statistics are, however, prepared in a number of provinces or parts of provinces from "village papers," i.e., papers prepared by the village accountants for the purpose of assessment and collection of land revenue. The area given in the village papers of the United Provinces, the Central Provinces, Madras, the Punjab, and the North-West Frontier Province differs to some extent from the area ascertained by professional survey. The causes of this difference are: (a) while the surveyed area of a district or province is calculated in block, the area by village papers represents the added total of field and village areas, and (b) the system followed as regards the inclusion or exclusion of areas covered by water, buildings, roads, and rail roads is not uniform in the two sets of returns. Substituting the area by village papers for the area by survey in respect of provinces and tracts where the two sets of returns differ, the actual area of British territory for which statistics are given in this volume is 618,204,000 acres, as against 621,226,000 acres according to the professional survey.

This area is, for the purpose of Agricultural Statistics, classified as Table II

	Acres (1,000)	Per cent
Forests	88,245	14.3
Not available for cultivation	141,505	22.9
Culturable waste other than fallow	114,848	18.6
Current fallows	61,347	9.9
Net area sown	212,259	34.3
Total	618,204	100

shown in the margin. About Classification of
area
88,245,000 acres, or 14 per cent of the total, are occupied by forests; and the area not available for cultivation, i.e., land absolutely barren or unculturable or covered by build-

ings, water, and roads, or otherwise appropriated to uses other than agriculture, amounts to 141,505,000 acres or 23 per cent. The balance, 388,454,000 acres or 63 per cent, represents the area available for cultivation. Of this, 114,848,000 acres, or 19 per cent of the total area, represent culturable waste other than fallow, i.e., land available for cultivation but not taken up, and 61,347,000 acres, or 10 per cent, were kept fallow in the year of report. The net area actually sown with crops during 1920-21 was therefore 212,259,000

	Proportion of sown to total area	Population per 100 acres of sown area
Delhi	52 per cent	255
Bombay	50 "	60
United Provinces	50 "	138
Bengal	48 "	186

Coorg	14 "	124
Burma	14 "	76
Sind	12 "	92
British India	31 "	114

acres, or 34 per cent of the total area, as against 222,825,000 acres in the preceding year, or a decrease of 5 per cent. The proportion of sown to total area and the number of population per 100 acres of sown area in each province are stated in the margin. The proportion of sown to total area in the year under review was highest in Delhi and lowest in Sind. This area, however, excludes areas sown more than once in

the year. If areas sown more than once are taken as separate areas for each crop, the gross area sown in the year of report amounts to 239,201,000 acres, as against 254,991,000 acres in the preceding year.

The term "forests" in the returns of Agricultural Statistics means Forests
"any land classed or administered as forest under any legal enactment dealing with forests." Any cultivated areas existing within such forests may, however, be excluded from that head and entered in the column "net area sown." The forest areas returned in the Agricultural Statistics do not agree in most cases with those stated in the Reports on the administration of the Forest Department for various reasons,* the chief amongst which are the following :—(1) the forest administration reports and the returns of agricultural statistics relate in many cases to different periods, (2) the administration reports relate exclusively to forests worked by the Forest Department, while the tables of agricultural statistics include, in addition, forest areas administered by district officers, and (3) certain village lands worked by the Forest Department and returned as forest lands by that Department are not treated as forests in the returns of Agricultural Statistics but are included under the proper heads of cultivated or uncultivated lands as the case may be. Of the total forest area (88,245,000 acres in 1920-21), 25 per cent lies in Burma, 19 per cent in the Central Provinces and Berar, 15 per cent in the Madras Presidency, 11 per cent in the United Provinces, 10 per cent in the Bombay Presidency, and the remaining 20 per cent in the other provinces.

As is naturally expected, most of the barren and unculturable lands lies Area not available
for cultivation
in the hilly tracts of Burma and of Southern India and in the dry and deserty regions of north-western India. Of the total area "not available for cultivation" (141,505,000 acres in 1920-21), about 31 per cent lies in Burma, 15 per cent in the Madras Presidency, 10 per cent in Sind, and 9 per cent in the Punjab.

The head "culturable waste other than fallow" shows lands available for Culturable waste
other than fallow
cultivation but not yet taken up. It includes areas such as groves not classed in the sown area and also areas under bamboos and thatching grass when not

* For detailed explanations in respect of provinces, see notes at foot of Table II, Nos. 25 to 40.

forming parts of forest areas.* Of the total culturable waste land (114,848,000 acres in 1920-21), 21 per cent is in Burma, 14 per cent in the Punjab, 13 per cent in the Central Provinces and Berar, 12 per cent in Assam, 10 per cent in the Madras Presidency, and the remaining 30 per cent in the other provinces.

current fallows

The maximum period for which land left uncultivated is reckoned as fallow varies according to local laws and customs in the different provinces, from two years in the Punjab and the North-West Frontier Province to ten years in the Bombay Presidency. After this period the land, if still left uncultivated, is treated as abandoned and included under the head "culturable waste." Owing to this diversity of practice, the classification of area as "culturable waste" and "current fallows" is of doubtful statistical accuracy; a plot of land, for instance, left uncultivated for, say, six years, would be treated as fallow in the Bombay Presidency, but as culturable waste in the Punjab. The total area returned as "current fallow" in 1920-21 was 61,317,000 acres, as against 52,135,000 acres in the preceding year, or an increase of 18 per cent.

Table III
Irrigation

The total area irrigated in 1920-21 was 48,957,000 acres, as against 48,963,000 acres in the preceding year. Of this area, 20,078,000 acres were irrigated from Government canals, 2,565,000 acres from private canals, 7,237,000 acres from tanks, 14,242,000 acres from wells, and 4,835,000 acres from other sources of irrigation. In India irrigation is ordinarily resorted to on an extensive scale in tracts where the rainfall is most precarious. In Lower Burma, Assam, Eastern Bengal, and the Malabar Coast (including the Konkan),

	Proportion of irrigated to total sown area per cent
Sind	80
Punjab	59
North-West Frontier Province	53
Ajmer-Merwara	38
United Provinces	33
Delhi	32
Madras	28
Bihar and Orissa	21
Burma	8
Bengal	8
Central Provinces and Berar	5
Bombay	4
Assam	4
Coorg	3

where the rainfall is ordinarily heavy, the crops hardly need the help of irrigation, unless there is an unusual scarcity of rain. Of the total area irrigated in 1920-21, the Punjab accounted for 27 per cent, the United Provinces 23 per cent, the Madras Presidency 19 per cent, Bihar and Orissa 12 per cent, Sind 6 per cent, and the remainder of the other provinces (13 per cent). The proportion of irrigated to total sown area in each province is stated in the margin. The proportion is highest in the driest province of Sind.

The figures in the preceding paragraph do not take into account areas sown more than once during the year with the help of irrigation, but indicate the extent of land actually irrigated. Counting areas sown more than once as separate areas for each crop, the gross area of irrigated crops was 52,519,000 acres in 1920-21. Of this area about 86 per cent was under food crops and the remainder under non-food crops. Of the irrigated food-crop area, 10,218,000 acres, were sown with wheat, 31,663,000 acres with other cereals and pulses, and 3,415,000 acres with other food crops. These statistics of irrigated crops are in some cases defective as explained in the notes at the foot of Table III (pages 70-77).

Table IV
Area under crops

The areas cultivated with the different crops represent the areas actually sown, whether the crop comes to maturity or not, except in cases where fields, owing to the failure of the first sowings, have been devoted to other crops, and in these cases the area first sown is omitted. In cases where two or more crops are grown together on the same field, an estimate is made of the area covered by each, and the areas so estimated are separately returned under the respective crop headings. The estimate is made by the village accountant, or is subsequently determined on formulæ prescribed by the provincial authorities. In certain tracts, where the village staff does not exist, estimates are made on the best available information. An exception to the above rule is, however, made in the United Provinces, where the area sown with unimportant mixed crops, for which no separate heading is provided in the provincial crop statements,

* For detailed explanations in respect of provinces, see notes at foot of Table II, Nos. 25 to 40

is assigned to the principal crops by the village accountant. In the same province this procedure is also followed in the case of oilseeds thinly sown in combination with food-grains and in this case the whole area of the mixed field is assigned to food grains.

The gross area cultivated with crops was, as stated above, 239 million acres in 1920-21. The different classes of crops and the area occupied by each class are stated in the margin. Of the total sown area, food-crops occupied

	Acres (1,000)	Per cent of total
Food-grains	186,890	78.2
Condiments and spices	1,331	0.6
Sugar	2,706	1.1
Fruits and vegetables	5,172	2.2
Miscellaneous food-crops	1,104	0.5
Total food-crops	197,206	82.6
Oilseeds	12,370	5.2
Fibres	17,316	7.2
Dyes and Tanning materials	729	.3
Drugs and narcotics	2,039	.8
Fodder crops	8,108	3.4
Miscellaneous non-food crops	1,090	.5
Total non-food crops	41,652	17.4

about 197,206,000 acres or 83 per cent and non-food crops about 41,652,000 acres or 17 per cent. Of the food-crops, food-grains (cereals and pulses) covered as much as 186,890,000 acres†, or about 78 per cent of the total area sown, and other food-crops (condiments and spices, sugar, fruits and vegetables, and miscellaneous food-crops* together) some 10,316,000 acres or only 4 per cent of the total. Of non-food crops, fibres such as cotton, jute, hemp, etc., occupied 17,316,000 acres or 7 per cent of the total area sown, and oilseeds 12,370,000 acres ‡ or 5 per cent. The other non-food crops*—dyes and tanning materials, drugs and narcotics (tobacco, tea, coffee, opium, etc.), fodder crops, and miscellaneous non-food crops together—occupied some 11,966,000 acres or 5 per cent of the total.

The area under food-grains (186,890,000 acres) showed a decrease of 12,777,000 acres or 6 per cent as compared with the preceding year. The actual

	1920-21	1919-20	Increase (+) or Decrease (—)
	Acres (1,000)	Acres (1,000)	Acres (1,000)
Rice	78,120	78,706	—586
Wheat	20,306	23,530	—3,162
Barley	6,268	7,519	—1,251
Jowar	22,690	23,488	+202
Bajra	12,002	14,582	—2,580
Ragi	4,239	4,222	+17
Maize	6,200	6,056	+140
Gram	9,464	12,941	—3,477
Other grains and pulses	27,533	29,023	—1,490

increase or decrease under each kind of grain is stated in the marginal table. It will be seen that all the crops except jowar and ragi showed a decrease. Of the total area shown in the table under food-grains, 19 per cent was in the United Provinces†, 16 per cent in the Madras Presidency, 1.4 per cent in Bihar and Orissa, 12 per cent in Bengal, 9 per cent each in the Punjab and the Bombay Presidency, 7 per cent in the Central Provinces, and the remaining 14 per cent in the other provinces.

The area under oilseeds (12,370,000 acres) showed a decrease of 201,000 acres, or nearly 2 per cent as compared with the preceding year. The actual

	1920-21	1919-20	Increase (+) or Decrease (—)
	Acres (1,000)	Acres (1,000)	Acres (1,000)
Linseed	1,496	2,245	—749
Sesamum	3,692	3,491	+101
Rape and mustard	2,979	3,680	—701
Other oilseeds	4,303	3,155	+1,148

increase or decrease under each kind of oilseeds is stated in the margin. Of the total area under oilseeds shown in this table, 28 per cent was in the Madras Presidency, 16 per cent in Bihar and Orissa, 12 per cent in the Central Provinces and Berar, 10 per cent in Bengal, 12 per cent in Burma, 6 per cent in the Punjab and the Bombay Presidency each, 5 per cent in the United Provinces,‡ and the remaining 5 per cent in the other minor provinces.

* For a list of these crops, vide Appendix C.

† In the United Provinces, the whole of the area sown with food-grains mixed with oilseeds is shown under food-grains. The area included under food-grains, which was locally sown with oilseeds (as a mixed crop), is roughly estimated to have been 3,000,000 acres in the whole province in 1920-21. Excluding this area of 3 million acres under oilseeds, the total area under food-grains in British India in 1920-21 would come to 184 million acres instead of 187 million acres.

‡ The figures shown under the several heads of oilseeds in Table IV against the United Provinces of Agra and Oudh represent areas under "pure" oilseeds, i.e., oilseeds sown unmixed with any other crop, excluding the oilseeds which are thinly sown in combination with wheat, barley, gram, and other food crops. If the areas occupied by the scattered oilseeds plants were added up, it is estimated very roughly that they would amount in 1920-21 for the whole of the United Provinces to about 3 million acres. Including this area, the total area under oilseeds in British India in 1920-21 would come to nearly 15 million acres.

**Condiments and
spices**

The total area under condiments and spices in 1920-21 was 1,331,000 acres as against 1,620,000 acres in the preceding year, or a decrease of 286,000 acres or 18 per cent. As is expected, spices are grown mostly in the southern parts of India, the Madras Presidency alone accounting for about 50 per cent of the total area under condiments and spices in 1920-21.

Sugar

The total area under sugar in 1920-21 was 2,706,000 acres, as against 2,813,000 acres in the preceding year, or a decrease of 107,000 acres or 4 per cent. Of this area, about 2,511,000 acres were occupied by sugarcane, as against 2,617,000 acres in the preceding year. 51 per cent of the sugarcane area was in the United Provinces, 18 per cent in the Punjab, 11 per cent in Bihar and Orissa, 9 per cent in Bengal, and 1 per cent in the Madras Presidency. The other sugar-yielding plants, namely, date palm and palmyra palm, occupied a total area of 165,000 acres as against 166,000 acres in the preceding year. About 51 per cent of this area was in the Madras Presidency and 34 per cent in Bengal.

Fibres

Fibre crops occupied 17,316,000 acres in 1920-21, as against 18,865,000 acres in the preceding year, or a decrease of 1,549,000 acres. The actual decrease under the several kinds of fibres is shown in the marginal table.

	1920-21 Acres (1,000)	1919-20 Acres (1,000)	Decrease (-) Acres (1,000)	
Cotton	14,111	15,318	-1,207	The area under cotton showed a decrease of 8 per cent. Of the total cotton area, 32 per cent was in the Central Provinces and Berar, 25 per cent in the Bombay Presidency, 15 per cent in the Madras
Jute	2,473	2,800	-327	Presidency, 14 per cent in the Punjab, and 8 per cent in the United Provinces. The area under jute showed a decrease of about 12 per cent. About 88 per cent of the total jute area was in Bengal and the remaining 12 per cent in the adjoining provinces of Bihar and Orissa and Assam. Other fibres also showed a decrease of 2 per cent as compared with the preceding year.
Other fibres	729	717	-12	

**Dyes and Tanning
materials**

The total area under dyes and tanning materials was 729,000 acres in 1920-21. Of this, the area under indigo was 211,000 acres, showing a decrease of 2,000 acres or 1 per cent. Of the total indigo area, 46 per cent was in the Madras Presidency, 18 per cent in Bihar and Orissa, 19 per cent in the United Provinces, and 11 per cent in the Punjab. Other dyes and tanning materials covered an aggregate area of 498,000 acres.

Drugs and narcotics

The total area under drugs and narcotics was 2,039,000 acres in 1920-21, as against 2,293,000 acres in the preceding year, or a decrease of 254,000 acres. The actual increase or decrease under each kind of drugs and narcotics is stated in the marginal table.

	1920-21 Acres (1,000)	1919-20 Acres (1,000)	Increase (+) or decrease (-) Acres (1,000)
Opium	121	182	-61
Coffee	96	96	0
Tea	661	701	-40
Tobacco	972	1,101	-129
Other drugs and narcotics	226	213	13

Fodder crops

The head "fodder crops" shows only those crops which are used exclusively as fodder in normal times. These are oats, field vetch, guinea grass, lucerne, fodder jowar, and carob or locust tree. The total area under fodder crops in 1920-21 was 8,108,000 acres, as against 8,206,000 acres in the preceding year.

**Fruits and vegetables
including root crops**

The total area occupied by fruits and vegetable crops in 1920-21 was 5,172,000 acres, as against 5,675,000 acres in the preceding year. [For the names of the fruits and vegetable crops cultivated in India, see Appendix C.]

Miscellaneous crops

The total area occupied by miscellaneous crops, that is, crops not classified under any of the heads specified above, was 2,191,000 acres. Of this, about 1,104,000 acres were occupied by miscellaneous food-crops and about 1,090,000 acres by miscellaneous non-food crops. [For the names of the crops included under these heads, see footnotes on pages 128 to 135 and Appendix C.]

**Area sown more than
once**

The total extent of land on which more than one crop was cultivated during the year was 26,942,000 acres, as against 32,165,000 acres in the preceding year.

The statistics recorded in Table V are based on cattle censuses. The census is taken annually in certain provinces and quinquennially in others.¹ The first general quinquennial census was taken in 1919-20. Live-stock in cities and cantonments are included wherever it is possible to secure their enumeration. The animals are divided into three classes, namely, (1) bovine, comprising oxen and buffaloes, (2) ovine, comprising sheep and goats, and (3) others, comprising horses and ponies, mules, donkeys, and camels. The total number of live-stock of each of these three classes in each province,

Table V
Live-stock, ploughs
and carts

	Number in thousands				
	Bovine	Ovine	Others	Ploughs	Carts
Bengal	21,721	4,396	126	4,413	737
Madras	22,201	16,515	181	4,287	1,037
Bombay	8,181	2,890	205	1,003	625
Sind	1,818	1,592	300	261	67
United Provinces	29,764	6,100	761	4,872	841
Bihar and Orissa	19,857	4,139	198	3,051	494
Punjab	14,109	7,086	1,265	2,211	302
Burma	5,731	301	98	662	668
Central Provinces and Berar	11,121	1,237	173	1,385	850
Assam	5,172	797	20	912	49
North-West Frontier Province	1,132	834	200	213	10
Ajmer-Merwara	314	417	11	35	11
Delhi	186	30	11	17	6
Coorg	145	3	1	31	1
Manpur	6	1	...	1	...
Total	116,103	40,368	3,553	23,551	5,736

together with the numbers of ploughs and carts, is stated in the margin. Of the total number of live-stock of the bovine class (14½ millions), which is cattle proper, the United Provinces, accounted for 20 per cent, Bengal 17, Madras 15, Bihar and Orissa 14, the Punjab 10, the Central Provinces and Berar 8, Bombay including Sind 7, and the remaining provinces 9 per cent. In the case of stock of the ovine class (sheep and goats), however, Madras

accounted for 36 per cent of the total, followed by the Punjab (15 per cent), the United Provinces (13 per cent), Bombay including Sind (10 per cent), Bengal, and Bihar and Orissa (9 per cent each). The table below shows the number of live-stock of the bovine class (which is cattle proper) per 100 acres of sown area and per 100 of the population of each province. It will be seen that the number of cattle per 100 acres of sown area ranges between 33 in Bombay and 103 in Bengal and Coorg, while the number per 100 of population varies from 28 in Delhi to 120 in the Manpur Pargana. The average for British India, as a whole, is 65 per 100 acres of sown area and 60 per 100 of the population.

	Number of cattle			Number of cattle	
	Per 100 acres of sown area.	Per 100 of popula- tion.		Per 100 acres of sown area.	Per 100 of popula- tion.
Bengal	103	55	Central Provinces and Berar	48	80
Madras	67	54	Assam	95	82
Bombay	33	65	North-West Frontier Province	67	60
Sind	51	55	Ajmer-Merwara	100	63
United Provinces	87	63	Delhi	71	28
Bihar and Orissa	80	68	Coorg	103	83
Punjab	66	71	Manpur	86	120
Burma	38	61			

The varieties of land tenure in the different provinces are included in Table VI and are given, as far as possible, under one or other of the following three heads, namely, (1) *raiyatwari*, (2) *zamindari* and village communities (temporarily settled), and (3) *zamindari* (permanently settled). When the revenue is assessed by the State, permanently or temporarily, on an individual or community owning an estate, and occupying a position identical with or analogous to that of a landlord, the tenure is known as *zamindari* or village community; and when the revenue is assessed on individuals who are the actual occupants, or are accepted as representing the occupants, of smaller holdings, the tenure is known as *raiyatwari*. Under either system there may be rent-paying subtenants. *Zamindari* tenure may be either *permanently settled*, i.e., where the land

Table VI
Land Revenue
Assessment

¹ In Burma, the Central Provinces and Berar, Ajmer-Merwara and Manpur Pargana the census is taken annually; in all other provinces it is taken quinquennially.

revenue has been fixed in perpetuity, or *temporarily settled*, i.e., where the land revenue is fixed for a number of years only. Village communities and raiyatwari tenures are, as a rule, temporarily settled, and the land revenue assessed on them are changeable from time to time.

The following table shows the position in the surveyed areas of the various provinces, as regards the forms of land tenure, according to the latest statistics available; the figures roughly indicating the extent to which the different systems prevail :—

	Raiyatwari	Zamindari (individual proprietors or village communities) settled		Total
		Permanently	Temporarily	
	Acres (1,000)	Acres (1,000)	Acres (1,000)	Acres (1,000)
Bengal	39,303	11,152	50,455
Madras	61,462	29,586	...	91,048
Bombay	44,804	...	3,912	48,716
Sind	30,142	30,142
United Provinces	7,537	60,767	68,304
Bihar and Orissa	41,511	11,292	52,803
Punjab	56,309	56,309
Burma	108,850	108,850
Central Provinces	12,363*	...	40,449	52,812
Berar	11,375*	11,375
Assam	25,813	3,931	1,746	31,490
North-West Frontier Province	8,438	8,438
Ajmer-Merwara	974	797	1,771
Delhi	368	368
Coorg	1,012	1,012
Manpur	31	31
Total	295,852	122,842	195,230	613,924

It will thus be seen that about 48 per cent of the total area is held by *raiayatwari* proprietors, while 20 per cent is held by permanently settled and 32 per cent by temporarily settled *samindari* proprietors.

The statistics for this table are collected annually in Burma, Assam, Manpur, the Punjab, Delhi, the North-West Frontier Province, and the Central Provinces and Berar, and quinquennially in Bengal, Bihar and Orissa, the United Provinces, Ajmer-Merwara, Bombay, Sind, Madras, and Coorg. According to the latest statistics available, the total revenue from land

	Total revenue from land (Rs.1,000)	Total popula- tion (1,000)	Revenue per head R a.
Bengal	2,93,56	44,588	— 11
Madras	6,80,57	41,405	1 10
Bombay	3,45,61	14,836	2 5
Sind	92,74	3,279	2 13
United Provinces	6,72,83	47,172	1 7

Total	35,06,28	241,507	1 8

Table VII
Harvest prices

Table VII shows prices of staple crops at harvest-time. It will be seen from this table that the average prices of wheat, barley, maize, gram, sugar

* Including Government forests.

† Sums remitted on account of unoccupied lands, short crops, etc., are wholly excluded from this total amount in the case of provinces where all remissions are granted within the year to which the return relates, but in provinces where remissions are not granted or are only partially granted within the year, no deduction is made on account of remissions.

(raw), and tobacco were higher than in the previous year, while those of winter rice, rice (unhusked), cholam or jowar, kambu or bajra, cotton (cleaned), jute, linseed, rape and mustard, sesamum, and groundnut were lower.

The Agricultural Department in each province maintains a statement of the average yield, per acre of land of average quality, irrigated and unirrigated, of crops in each district. In order to test the accuracy of the standards of normal or average yield, and if necessary, to revise these, a system of crop-cutting experiments exists in all the provinces. Under this system plots of land of average quality are selected, and the crops grown on them are cut and weighed in the presence of responsible officers of the district staff or of the Provincial Agricultural Department. The results of the experiments are reported to the head of the Provincial Agricultural Department, who revises the standards in the light of these returns. This revision is ordinarily made once in five years, although crop-cutting experiments are usually carried out for the principal crops each year. The table in Appendix A shows the figures as last revised with reference to the crop-cutting experiments made up to 1916-17. As time goes on the figures become more accurate, and it may be noted that the general trend of the changes made is in an upward direction.

Appendices B and C require little or no comment. Appendix B explains the vernacular terms used in this volume, and Appendix C the classification in Table IV of the various crops cultivated in India.

The map, charts, and diagrams appended to the volume illustrate—

- (1) the departure of sown area and that of rainfall in 1920-21 from the average of the preceding ten years ;
- (2) variations in rainfall as compared with the normal in relation to the total area sown, food-crops area, and current fallows (reversed) ;
- (3) rainfall in wheat-growing tracts (June to February) as compared with the total and unirrigated wheat areas ;
- (4) total cultivable area, total uncultivable area, net area sown, culturable waste other than fallow, and current fallows ;
- (5) total area sown, total area under food crops, total irrigated area sown, and total area under non-food crops ;
- (6) area under rice, wheat, millets, oilseeds, cotton, jute, and other crops ;
- (7) total area sown and area under different crops ;
- (8) total live-stock divided between bovine, ovine, and others ;
- (9) shares of provinces in the total area under principal crops,
- (10) harvest prices of some of the principal crops.

D. N. GHOSH,
Offg. Director of Statistics.

DEPARTMENT OF STATISTICS, INDIA,
Calcutta, September 9, 1922.

2. Total area sown, area under food crops, current fallows (reversed) and variations in rainfall, as compared with normal.

3. Total wheat area, unirrigated wheat area and rainfall in wheat-growing tracts (June to February).

NOTE.—The scale of the curves in Chart No. 3 for "total wheat area" and "unirrigated wheat area" has, in order to effect a better comparison, been made much larger than that used for the curve showing "rainfall."

4. Total cultivable area, total uncultivable area, net area sown, culturable waste other than fallow and current fallows.

NOTE.—1. "Total cultivable area" represents the sum of net area sown, culturable waste, and current fallows.
2. "Uncultivable area" includes the area under forest.

5. Total area sown, total area under food crops, total irrigated area sown, and total area under non-food crops.

6. Area under rice, wheat, millets, oilseeds, cotton, jute, and other crops.

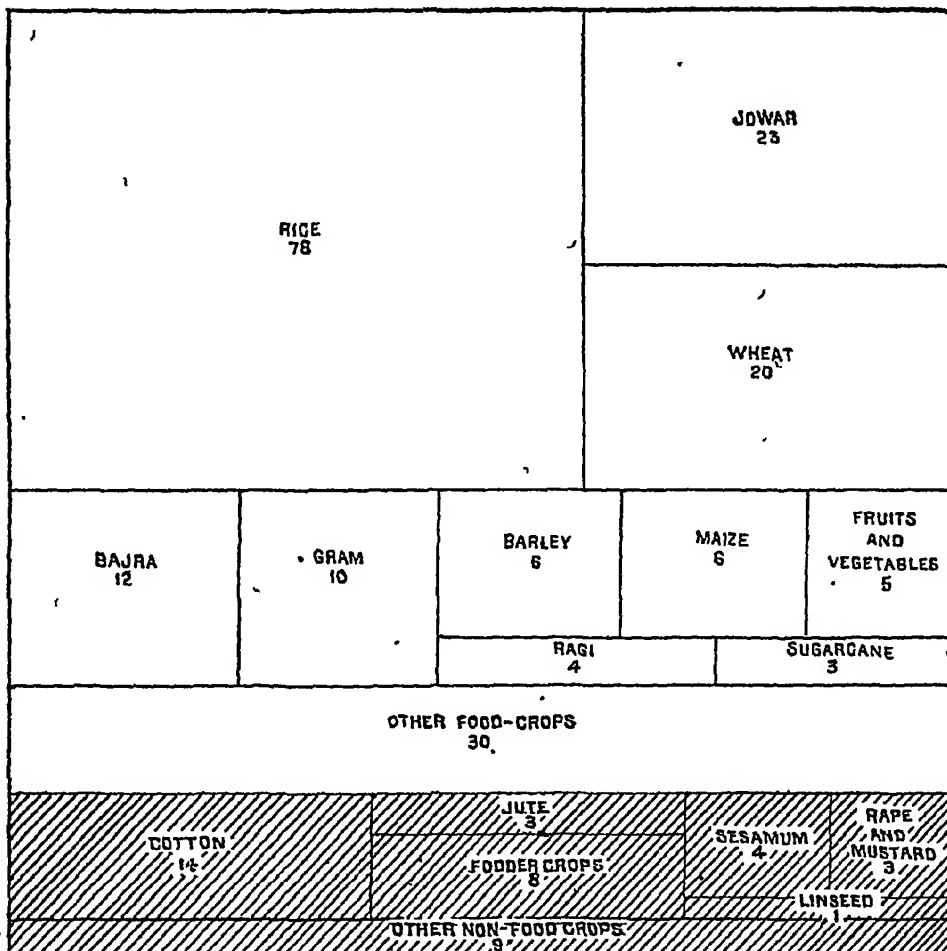

NOTE.—Millets represent jowar, bajra, and ragi.

7. Total area sown in 1920-21.

Total area sown	239 million acres
Area under food crops (unshaded)	197 " "
Area under non-food crops (shaded)	42 " "

(in Million acres.)

NOTE.—“Other food crops” are minor food-grains, condiments and spices, and miscellaneous food crops.
 “Other non-food crops” are oilseeds other than sesamum, linseed, rape and mustard; fibres other than cotton and jute; dyes; drugs and narcotics; and miscellaneous non-food crops.

8. Total livestock, divided between bovine, ovine, and others in 1920-21, as compared with the year 1911-12.

1911-12

1920-21

NOTE.—“Bovine” includes bulls and bullocks, cows, buffaloes, calves, and buffalo calves.
 “Ovine” includes sheep and goats.
 “Others” include horses and ponies, mules, donkeys, and camels.

9. Shares of provinces in the total area (in acres) under principal crops in 1920-21.

RICE
78 MILLIONS

WHEAT
21 MILLIONS

JAWAR
32 MILLIONS

BAJRA
12 MILLIONS

SUGARCANE
3 MILLIONS

TEA
61,000

SESAMUM

* Miscellaneous revenue

(a) Figures not available

† Excludes Rs 15,18,959 in Dinajpur for which details are not available due by the Zamindars to Government, not those due by raiyats to the Zamindars. The actual realisable demand on account of the year whether crops, etc., are included in the case of those provinces where all remissions are granted within the year to which the return relates, but in includes all the heads classed as "Land Revenue" in the Civil Accounts. The heads are:—(1) ordinary revenue, comprising fixed collections, rent estates, kyan tax (Burma); (2) sale of Government estates; (3) sale proceeds of waste lands, and redemption of land tax; (4) redemption of survey and settlement charge (Bengal); (5) rents, etc., of fisheries; (6) receipts for the improvement of Government estates; (7) 12 per cent from quarries and minor mineral products in forests and lands not under the management of the Forest Department, water mills rent, hucoba tax Madras Act, II of 1861, capitation tax (Burma), petroleum well revenue, jade and amber revenue, Thalamedia tax (Burma), receipts from ruby land, and rents of buildings situated on such lands

Column 8.—As in column 5, but only ordinary land revenue on fully assessed areas is entered

(a) Including the territory of Alsace Lorraine (b) Includes hemp (c) Preliminary estimate (d) Excluding the "Nile" crop

* Including figures for Indian States, namely, 3,499,000 acres for rice, 5,544,000 acres for wheat, 861,000 acres for barley, 1,962,000 acres for maize, 7,234,000 acres for cotton, and 422,000 acres for linseed. The figures for rice, barley, maize and linseed for Indian States are, however, not complete, as returns for those crops are not furnished by a number of States

Note.—The figures for foreign countries have been taken from the Bulletins of Agricultural and Commercial Statistics published by the International Institute of Agriculture, Rome

(a) Increase due to the adoption of the latest census figures of 1911

Column 2.—The professional survey is that carried out by the Survey of India in Northern India, and by the corresponding Departments in the Southern Presidencies. The provincial areas in this column exclude Indian States in direct political relations with the Government of India, but include States politically controlled by Local Governments, with the exception of the Southern Shan States in Burma and the Tribal areas in the North-West Frontier Province.

Column 3.—In this column is entered the area of Indian States included in column 2.

Column 4.—Prior to 1908-09 this column showed the entire area (exclusive of Indian States) for which the statistics required for Tables II, III and IV were not forthcoming in whole or in part. This area comprised chiefly estates held in permanent settlement or on privileged tenure, which were not surveyed or which possessed no agency for the annual collection of agricultural statistics. But arrangements have since been made to prepare statistics for the whole of this area, based either on regular returns or on estimates as has been found practicable. There is therefore no longer any unreturned area to be shown in this column.

Columns 5 and 6.—Column 5 is a check on the accuracy of column 6. In the latter "village papers" mean "the papers prepared by the village accountants." The village papers do not in several provinces relate to the whole area included in column 5; for instance, the village returns sometimes do not include the forest areas. There are also tracts in many provinces for which no village papers exist and for which estimates have to be made to complete the statistics. In all such cases, column 6 must be taken to be the total area corrected by the village papers in respect of the areas for which such papers exist. The areas of provinces and districts, which are calculated from village papers, are necessarily somewhat different from those given by the Survey Department, (a) because, while the survey area of a district or province is calculated in block, the area by village papers represents the added total of field and village areas; and (b) because the system followed as regards the inclusion or exclusion of areas covered by water, buildings, roads, and railroads, is not uniform in the two sets of returns. In provinces where no village papers exist, the figures in column 5 have been repeated in column 6. In that case they represent the area of which the details are stated in columns 2 to 6 of Table II.

Column 2 states the area as ascertained by the provincial Survey Department, supplemented, for tracts which have not come under the operations of that Department, by areas obtained with the computing scale from the Survey of India Atlas sheets of the localities concerned.

Columns 5 and 6.—The statistics for the major portion of the zamindari estates and certain raiyatwari and whole inam villages are based on estimates, owing to the absence of adequate agency for the collection of statistics in these tracts. Of the total area (80,774,877 acres) entered in column 6 for 1920-21 (page 21), 68,359,510 acres are based on actual returns and 21,415,367 acres on estimates.

(a) A new district formed out of Ganjam, Vizagapatam and Godavari.

See explanations given in the footnotes (page 20)

(a) Includes the unaccounted for difference between the Atlas sheet area and traverse area on the one hand, and the estimated area in the village accounts of unsurveyed areas, on the other. The difference was about 931,000 acres in 1919-20 and 928,000 acres in 1920-21

(b) Travancore and Cochin

(c) Excludes about 8,610 acres of the Attappully valley in Wallayanad Taluk transferred to Coimbatore District but which have not been included in the returns of that District.

Column 2 states the area as returned by the provincial Revenue Survey and Settlement Department, supplemented in the case of Indian States by the returns of the topographical survey

Columns 5 and 6.—The figures of column 5 are repeated in column 6, because the areas in village papers are derived from the revenue survey records. The figures for all unsurveyed villages are based on estimates. Of the total area (48,719,208 acres) entered in columns 5 and 6 for 1920-21 (page 23), 44,573,879 acres are based on actual returns and 4,145,329 acres on estimates

<i>Total</i>					
1919-20	34,013,208	3,872,000	30,141,208	30,141,208
1920-21	34,013,521	3,872,000	30,141,521	30,141,521

Column 2 states the area as returned by the provincial Revenue Survey and Settlement Department, supplemented in the case of Indian States by the returns of the topographical survey. The revenue survey being incomplete in Sind, the exact area is not known: the column states the area of surveyed tracts plus the estimated area of unsurveyed tracts.

Columns 3 and 4.—The figures of column 3 are repeated in column 4, because the areas in village papers are derived from the revenue survey records. The figures for all unsurveyed villages are based on estimates. Of the total area (30,141,521 acres) entered in these columns for 1920-21, 30,016,613 acres are based on actual returns and 124,908 acres on estimates.

1920-21 : : : : }					

Columns 2, 5 and 6.—Where there has been no professional survey of the district, estimates framed in the best manner possible are accepted, subject to revision from time to time as surveys extend. Approximate figures for the Chin Hills and for the Kachin Hills (in the Bhamo, Myittha, and Katha districts) have been included from 1906-07 and for the Pakokku Hill Tracts from 1907-08. The omission of the Ruby Mines District and the changes in the areas of Katha district and the Northern Shan States follow on General Department Notification No. 458 of the 4th November 1920, under which the Ruby Mines district was abolished, the Katha district was enlarged by 1,196,550 acres, and 2,279,130 acres classed as Indian States were transferred to the Northern Shan States. This accounts for the reduction in the provincial total to 55,013,792 acres (columns 5 and 6). Of this area 14,200,447 acres are based on actual survey and the balance 40,813,345 acres on estimates.

(a) Partitioned in 1920-21 and amalgamated partly with the Katha district and partly with the Shan States.

The variations in the areas shown in different years under the same item in the same province or district do not necessarily represent an actual increase or decrease on the area in question. In many cases a revised classification or the correction of a faulty estimate is responsible for the change.

Column 2.—"Forests" mean "any land classed or administered as forest under any legal enactment dealing with forests." Any cultivated areas existing within such forests may be excluded and entered in column 6 (net area sown). The forest areas do not agree in most cases with those stated in the reports on the administration of the Forest Department for various reasons, the chief amongst which are these: (1) because the Forest Administration Reports and the statements of agricultural statistics relate in many cases to different periods, (2) because the administration reports relate exclusively to forests worked by the Forest Department, while the tables of agricultural statistics exhibit in addition forest areas administered by district officers, and (3) because, on the other hand, certain village lands worked and returned as forests by the Forest Department are not treated as forests in the returns of agricultural statistics and are therefore excluded from this column.

Column 3 includes all land absolutely barren, and also all land covered by buildings, water, roads, or otherwise appropriated to uses other than agriculture.

Column 4 includes groves not classed in the sown area. Areas under bamboos and thatching grass, when not forming parts of forest areas, are included in this column.

Table II—*continued*No. 25—CLASSIFICATION OF THE AREA (IN ACRES) OF EACH PROVINCE IN BRITISH INDIA—*continued*

See explanations given in the footnotes (page 40)

(a) Includes reserved and protected forests only. The management of the latter having been transferred to the revenue authorities, the figures shown in the forest administration report represent the areas of reserved forests, which slightly differ from those adopted for this table because the periods embraced are different

(b) Includes unculturable Government waste and unculturable *banes*

(c) States the estimated area of culturable Government waste

(d) Shows (1) the estimated area of culturable *banes*, and (2) the difference between the net area sown and the gross area of the actual holdings (exclusive of *banes*). It thus includes the unculturable lands within the actual holdings, the area of which cannot be ascertained

CLASSIFICATION OF AREA
(BENGAL)

NOTE.—Figures for unsurveyed villages are based on estimates

Column 2.—Includes land administered by the Forest Department whether formally declared forest under an Act or not, and differs from the area stated in the forest reports, because in certain localities, where the settlement is incomplete, the original areas are still returned by the Forest Department, while revised areas are returned in this table; also because the revenue records do not always state the most recent provisions

Column 3.—Includes all land recorded at the survey and settlement as inculturable, although at times a very small quantity of this land is cultivated

Column 5.—The maximum period for which land thrown out of cultivation is reckoned as fallow is ten years

Table II—*continued*No. 28—CLASSIFICATION OF THE AREA (IN ACRES) OF EACH DISTRICT IN

<i>Karachi</i>						
1919-20	163,447	5,708,882	823,720	420,438	410,889	7,581,876
1920-21	165,279	5,728,287	824,300	439,769	324,368	7,531,997
<i>Hyderabad</i>						
1919-20	70,857	441,221	945,186	777,016	599,738	2,833,968
1920-21	70,856	445,925	957,829	790,994	568,251	2,833,855
<i>Sukkur</i>						
1919-20	254,286	1,411,863	843,981	629,169	451,784	3,590,588
1920-21	254,265	1,466,911	791,061	713,995	358,924	3,568,156
<i>Larkana</i>						
1919-20	58,088	839,766	893,146	799,706	709,704	3,240,410
1920-21	59,496	774,036	909,868	840,077	658,829	3,241,804
<i>Upper Sind Frontier</i>						
1919-20	40,309	443,367	267,586	467,069	504,481	1,722,812
1920-21	40,309	444,332	267,425	554,336	416,577	1,722,979
<i>Thar and Parkar</i>						
1919-20	42,588	4,498,868	1,871,106	1,993,259	927,370	8,727,091
1920-21	43,706	4,493,278	1,886,668	1,611,233	792,784	8,727,664
<i>Navabshah</i>						
1919-20	88,716	771,287	427,425	741,309	465,221	2,193,958
1920-21	89,717	716,015	432,686	812,011	444,637	2,495,066
<i>Total</i>						
1919-20	718,291	14,109,754	6,017,100	5,227,966	4,069,187	30,141,298
1920-21	723,628	14,068,784	6,072,339	5,712,405	3,564,865	30,141,621

Column 2.—The figures do not agree with those in the Forest Administration Report, because the revenue records do not state the most recent alterations of area due to erosion by the Indus which the forest report does, and because, on the other hand, the forest report does not always exhibit the most recent alteration of area effected by the revision of survey, which the revenue records do.

Table II—*continued*No. 30—CLASSIFICATION OF THE AREA (IN ACRES) OF EACH DISTRICT IN THE
PROVINCE OF AGRA

Column 2.—Includes all lands specially allotted to forest growth under the control of Government or any Local Board or Municipality

Column 3.—This column includes 23,680 acres of river beds in Gurgaon, 15,360 acres of mountain tracts in Simla, and 3,896,999 acres of mountain tracts in Kangra. These areas are not accounted for in the village papers, and the figures are based more or less on estimates

Column 4.—Includes large areas of Government waste not allotted for cultivation

Column 5.—The maximum period for which land is reckoned as fallow is two years; but, as a change in classification is not generally made until the year for quadrennial statements comes round, the old classification may be retained from one to three years longer than the prescribed period. In certain districts in the south-west of the province, however, the classification is amended annually

(a) Rainfall insufficient

NOTE.—For tracts outside the surveyed area the figures are based on estimates.

Column 2.—The area entered in this column is that given in the Forest Administration Report, and includes reserved forests and fuel reserves. Estimates of the forest areas in certain hill tracts are also included. The forest areas in the South Shan States, which are included in the Forest Administration Report, are excluded from this table, no returns of agricultural statistics being prepared for those States.

Column 3.—In settled tracts the unculturable area is taken from settlement registers, but in unsettled tracts it is obtained from the best sources available.

Column 4.—Includes land thrown out of cultivation and abandoned. Groves, not classed in the sown area, and bamboos when not grown in forest areas, are also included in this column.

Column 5.—Includes only such land left uncultivated as is actually in the possession of cultivators. In Lower Burma (excluding the Thayetmyo district) such lands are assessed at privileged rates, but in Upper Burma and in Thayetmyo no assessment is levied on land left uncultivated.

(a) See foot note (a) on page 31.

Column 2—Shows the areas administered by the Forest Department; but the figures differ from those in the Forest Administration report, because the actual area of the forest is not known owing to incomplete survey, also because excisions made have not yet been taken note of in the forest registers, and because in many cases raiyatwari villages settled, thekadai villages surveyed, clearance leased villages earned in proprietary rights, and villages purchased under the waste-land sale rules, have not as yet been finally disforested and struck off the forest registers. In the case of the Chanda, Drug, Raipur, and Bilaspur districts this column also includes all areas in the zamindars' estates which fall outside the surveyed villages of those estates. These areas are almost wholly under forest and include only a negligible proportion of sparse and shifting cultivation.

Column 3—States areas covered with water, hill, or rock, and land occupied by buildings and roads.

Column 4—States (1) the waste area within holdings (including fallows of more than three years), (2) land under tree forest which is not administered under any Act dealing with forests, (3) land under scrub jungle or grass, and (4) groves not included in holdings.

Column 5—Land which has been fallow for not more than three years is reckoned as current fallow.

Column 2.—Includes the forest area administered by the Forest Department, but excludes a large area of cultivated land in the Melghat taluk in Amraoti shown as forest in the forest report

Column 3.—Includes village sites, tanks, and land taken up for public purposes or devoted to uses other than agriculture; it also includes unculturable portions of culturable fields

Column 4.—Includes land available for cultivation but not given out

Column 5.—Includes occupied culturable land left fallow for private reasons, such as grazing, rotation, etc

1920-21		3,554,655	5,510,500	13,858,001	2,837,233	5,755,033	31,515,452

Column 2—The figures represent reserved forests, but exclude the areas of forest villages within the reserves which are entered under the appropriate heads of this table

Columns 3 and 4—The figures for unsurveyed tracts in Cachar and for permanently settled tracts in Sylhet are based on estimates. In the Assam Valley unsurveyed waste is divided into culturable and unculturable on the assumption that their proportion in the surveyed area holds good

Column 5—Includes generally all lands which are thrown out of cultivation or not cultivated for three years, but which remain in the occupation of leaseholders. Figures for the hills districts except the plains portion of the Garo Hills and Sadiya Frontier Tract are rough estimates

Column 6—The figures are obtained from the abstract crop statement for districts which have been cadastrally surveyed. The figures for the permanently settled estates of Sylhet and Goalpara and for the hill districts and the Sadiya Frontier Tract are based on estimates

*The forest areas exclude the forest villages within the reserves

†Figures incomplete

‡The figures represent the area under tea only

Column 2—Includes all lands specially allotted to forest growth under the control of Government or any Local Board or Municipality, and protected village waste in Hazara administered by the district officer and other waste lands in Peshawar

Column 4—Includes large areas of Government waste not allotted for cultivation

Column 5—The maximum period for which land is reckoned as fallow is two years; but, as a change in classification is not generally made until the year for quadrennial statements comes round, the old classification may be retained from one to three years longer than the prescribed period. In Dera Ismail Khan classification is amended according to area of each class of soil actually cultivated each year

Columns 8 to 19 state the gross area of irrigated crops, areas sown more than once being counted as separate areas for each crop. The excess in some cases of the total area of crops irrigated (column 19) over the total area irrigated (column 7) is thus due to the inclusion in column 19 of the area irrigated at both harvests

(a) Included in column 14

(b) Included in column 16

(c) Included in column 18

(d) Includes 1,700 acres in Rajahmundry for which details are not available

1920-21

Column 4.—The term "tanks" refers to a particular kind of dammed reservoirs. These reservoirs are formed by throwing dams across the valleys of small rivulets and streams to intercept water during the rains.
(a) See explanation given in footnote (a) (page 20)
(b) The whole area of the district is not available for cultivation (vide Table II page 47.)

NOTE.—This table shows the areas actually sown, whether the crop comes to maturity or not, except in cases when fields, owing to the failure of the first sowing, have been devoted to other crops: in such cases the area first sown is omitted. In cases where two or more crops are grown together, an estimate is made of the area covered by each and the areas so estimated are separately returned. The estimate is made by the village accountant or is subsequently determined on formulae prescribed by the provincial authorities.

The variations in the areas shown in different years under the same crop in the same district do not in all cases represent an actual increase or decrease in the area under that crop. In certain cases a revised classification or the correction of a faulty estimate is responsible for the change.

Column 10 (other food-grains including pulses).—Arhar (pigeon pea), barbat, lobia or chowli (asparagus), mung (green gram), lath (horse gram), urad (black gram), field gram, oleik (job's tear), lentils, cheena (common millet), kangni (Italian millet), kodo or varagu, kuti (little millet), kuhudi, peas, pigeon or ootils grass, swank or shama, chickling vetch, buck wheat, wudalu or barti

Column 30 (other dyes and tanning materials).—Annatto, chayroot, divi-divi, henna, madder, morinda, safflower, saffron.
 Column 33.—In certain cases, notably in Madras, the areas stated under "Tea" differ from those given in the special report on tea production published separately. The principal reason is that the special report is prepared from returns received from managers and owners of estates; and these returns, especially in Southern India, are in many cases inaccurate and defective. Minor discrepancies are also due to the fact that the figures in this table deal with the agricultural year; while those in the special report deal with the calendar year.
 Column 37 (other drugs and narcotics).—Aloe, areca nut, sweet basil, betel-vine, country borage, bogoda brinjal or nela mulaka dhatura, purple flea-bane, isfagul, kolinji or rompali, senna, soap nut, sweet flag.
 (a) Increase due to a revised classification of crops.

Fodder crops	Fruits and vegetables including root crops	MISCELLANEOUS CROPS		Total area sown during the year	Area sown more than once	Net area sown during the year	PROVINCE

Column 39 (fodder crops).—Carob or locust-tree, loddoi cholam, lucerne, guinea grass, oats, field vetch.

Column 40 (fruits and vegetables including root crops).—Agasi, wood apple, cashew nut, custard apple, rose apple, artichoke, aum, beans, beetroot, bilimbi, bimb, binjal, cabbage, carol, cassava, cauliflower, celery, chicer, chiron, ciess, cucumber, drumsticks or horse radish, elephantfoot, fig, gajmal, cap gooseberry, country star gooseberry, goosefoot, gourd, gourd melon, grapes, guava, gumbeery, edible hibiscus, jack fruit, jujube, kanda, kankol, kamranga, karola, kavali, kavathi, koorka, lettuce, mango, mangosteen, manlachu, marianus, Indian medlar, mellow, oranges, papay, parwal or patol, peach, pineapple, plantain, black plum, hog plum, pomegranate, pomelo, ponnugantikula, potato, puliyannar, sweet potato, pumpkin, radish, raspberry, roselle, sankulu, sapodilla, sebestian, sorrell, water caltrop, spinach, strawberry, manila tamaind; tomato, turnip, uchiho, yams, elephant yams.

Column 41 (miscellaneous food crops).—Amaranthus, arrowroot, kirmi, mahuu.

Column 42 (miscellaneous non-food crops).—Chrysanthemum, dani (nip fruticans), dhaincha (sesbania acutata), flowers, margosa or neem tree, mulberry, chaplash, thekko (grass).

(a) Variations due to a revised classification of crops.

(b) Includes 342,173 acres in Nainital and Almora for which details of crops are not available.

(c) Increase in 1916-16 is due to inclusion of area under grass and babul previously shown as "fallow" in Table 11.

(d) Includes 312,192 acres in Almora and Naini Tal, for which details are not available.

(e) Includes 9,441 acres in North Arcot for which details of crops are not available.

(f) Includes 342,392 acres in Almora and Nainital for which details are not available.

(g) 343,117 "

NOTE.—The total in column 43 differs in some cases from the sum of the preceding column (vide footnotes b, d, e, f and g above.)

NOTE—The area sown with unimportant mixed crops, for which no separate heading is provided in the provincial crop statements is assigned to the principal crop by the village accountant. The areas of important mixed crops, namely, wheat and barley, wheat and gram, barley and gram, jowar and arhar, bajra and arhar, and cotton and arhar, for which separate headings are provided in the crop statements, are distributed in accordance with prescribed formulae and entered under the crops of which they are composed.

Columns 3, 4, 5, 6, 9, and 10—The whole of the area of the land planted with food-grains wheat, barley, etc., mixed with oilseeds is shown under food-grains in this table. The area shown under food-grains which was really planted with oilseeds (as a mixed crop) is roughly estimated to have been 3,374,000 acres in the whole of the United Provinces of Agra and Oudh in 1920-21.

(a) See explanations given as footnotes on pages 24 and 25 for Saharanpur, Muzaffarnagar and Nainital.

Columns 12, 13, and 14.—The figures shown in these columns represent areas under "pure" oilseeds, i.e., oilseeds sown unmixed with any other crop. Besides these, the oilseeds are thinly sown in combination with wheat, barley, gram, and other crops. If the areas occupied by the scattered plants were added up, it is estimated very roughly that they would amount in 1920-21 (for the whole of the United Provinces of Agra and Oudh) to 476,000 acres of linseed, 875,000 acres of sesamum, and 2,023,000 acres of rapeseed.

NOTE—No statistics are at present prepared by village or circle officers, except in the Sambalpur district. The figures for all other districts entered in this table are estimates. The estimates for Patna, Gaya, Shahabad, Saran, Champaran, Muzaffarpur, Darbhanga, Monghyr, Bhagalpur, Purnea, Puri, Cuttack (exclusive of small permanently-settled areas), Balasore, Angul, the Santhal Parganas, Hazaribagh, Ranchi, Palamau and Singhbhum, are, however, based on the figures collected during the cadastral survey.

NOTE.—The information is received from district officers who in their turn obtain figures from the district Land Records staffs in the case of the temporarily-settled areas and from Zamindars in the case of the permanently-settled portion of Goalpara, with the exception in the latter district of jute, the estimate for which is compiled by the village Chaukidari Panchayats. In the permanently-settled part of Sylhet the figures for jute are those submitted after actual inspection by the village Chaukidari Panchayats. The figures for tea are reported by the garden managers, while for all other crops estimates have been framed by the district officers from the actual areas in the surveyed parts, applied to the rest of the districts. The figures for the hill districts and the Sadiya Frontier Tract are rough estimates which are revised quinquennially except for cotton for the hill districts and sugarcane and rape and mustard for the Sadiya Frontier Tract for which estimates have to be made annually for the forecasts of these crops.

() Included in Col. 1G

* For Balipara Frontier Tract only tea figure is available

Note.—Live-stock in cities and cantonments are included wherever it is possible to secure their enumeration. Oxen and buffaloes not old enough for work or to produce young are treated as "young stock"

(a) Figures not available

(b) Figures for 1910-11, which are based on estimates, include Bihar and Orissa but exclude Eastern Bengal

(c) Included under "Young stock (calves)"

(d) Includes bulls, cows, and young stock (calves) for the Northern Shan States

(e) Includes cow buffaloes and young stock (buffalo calves) for the Northern Shan States

(a) An annual census is taken on the 15th March in Manipur

(b) The figures in columns 9 to 18 exclude Bengal (see Table V, No. 74)

(c) Statistics based on a census taken in 1913-14. Figures for columns 8, 17 and 18 were revised in 1914-15

(d) Excluding Eastern Bengal

(e) Included under "Young stock (calves)"

(f) In Coorg a census is taken every five years. The last Census was taken in March 1920 by the circle shanbags, and the particulars entered in a register maintained under Rule 73 of the Rules framed under the Coorg Land and Revenue Regulation, 1899. Animals in Municipal Towns are included

(g) Included under "Bullocks"

Note—Figure, for 1912-13 are based on a cattle census taken in 1912; the figures for most of the districts, in columns 2 to 4 have, however, subsequently been revised. The census did not take into account the animals named in columns 9 to 16 nor ploughs and carts (columns 17 and 18). Figures for 1919-20 under all the heads are based on a cattle census taken in 1920

(a) Includ under "Young stock (calves)"

* Revised in 1918-19

(a) Included under "Young stock (calves)"

NOTE—The last quinquennial census was taken in October 1919, in all villages, Government Inam, and Zamindari, and stock in cities, cantonments, and that employed in Government Departments and Municipalities were included. Oxen, buffaloes, horses and ponies not old enough for work or breeding were treated as young stock.

Note.—The table is prepared quinquennially on a census in each district taken every five years. The census which was one in 1913-14 but could not be taken in that year owing to famine in some of the districts, was taken in 1914-15 in all the districts, except Almora, Garhwal, and the hill tracts of Naini Tal. In these latter districts the census was taken in 1912. The last census was taken in 1920, except in Almora, Garhwal, and the hill tracts of Naini Tal.

(a) Included under "Young stock (calves)"

Notes.—The figures for 1913-14 shown in the table for all the districts of the Province, except Hazaribagh, Ranchi, Palamau, and Manbhum, were arrived at by a census of live-stock held in these districts towards the end of 1913. For Palamau, Hazaribagh, and Ranchi the figures are based on information collected during survey operations; while the figures for Manbhum are based on police reports. Corrections were made in the figures for Hazaribagh in 1915-16 and for Palamau in 1917-18. The figures for 1919-20 were ascertained by a census held in January 1920.

(a) Included under "Young stock (calves)"

Note.—Annual returns of agricultural stock are prepared by village headmen, revenue surveyors, and *tailikuggis*, the enumeration taking place from end of February to middle of March in each year. The figures include all animals in towns and also those employed in each district by Government departments, such as transport, military, police, and by municipalities.

(a) Estimated figures

(b) Includes bulls, cows and young stock (calves)

(c) Includes cow buffaloes and young stock (buffalo calves)

(d) See footnote (a) on page 32

Note.—The figures are collected annually, between the 1st January and the 15th March, by the patwari in each village for the areas in their respective charge. The total figure is recorded in the tahsil by the kanungo in a village register. The patwari takes into account all animals including those temporarily sent elsewhere (e.g., for grazing), which belong to residents of the village, and excludes animals which are temporarily in the village for grazing or other purposes, but do not belong to residents. Stock in large towns, cantonments, and in forest villages are included.

Note.—A census is made annually by the village officers. All cattle belonging to one owner are entered against his name, even though the animals are temporarily absent from the village. When an owner cultivates land in more than one village, the actual number in each particular village on the night of enumeration is entered in the statement for that village. Cattle belonging to other village, but temporarily in the village for grazing, are not entered in the statement for that village.

	1915-16 . . .	13,910,279	1,225,105	216,096	2,469,078	1,739,850
	1920-21 . . .	3,912,460	1,375,961	80,917	2,505,502	571,248

Note.—The varieties of tenure are included as far as possible, under one or other of the following heads, namely, (1) raiyatwari, (2) zamindari, and village communities (temporarily settled), and (3) zamindari (permanently settled). Areas under forests are included under the prevailing tenure of the province. In the Central Provinces and Berar, however, areas under Government forests are shown separately.

Column 3.—Areas held revenue-free or at privileged rates are deducted, but the deduction need not be made where such areas are in any case less than an entire village and where there is any difficulty in estimating the corresponding deduction to be made in the population (column 11). In Madras, Bombay, and Berar all land on which a full assessment has not been leviable during the year (for instance, assessed unoccupied land) is classed for the purposes of this column as "area not fully assessed." Area should not be entered under this head merely because the assessment due from them has been suspended or remitted on account of short crops or for other special reasons.

Column 4.—This head is sub-divided into (a) total fully assessed area for which returns are available, and (b) area cultivated out of the area given in head (a). The latter head should be equal to the former after deducting current fallows and fully assessed waste, and should be either equal to or less than the net sown area as shown in column 6 of Table II.

(§) The land revenue assessment necessarily differs from the land revenue collections which include collections on account of former balances and exclude so much of the assessment as has not been collected during the year.

* No details. † Includes 1,360,300 acres (in Dinajpur for which details are not available)

‡ Increase due to inclusion of certain Zamindari villages which were formerly included under Raiyatwari

(a) Excludes Bihar and Orissa districts constituted into a separate province

(b) Includes 3,407,181 acres in Dinajpur, Rangpur, and Pabna, for which details are not available

Column 5.—Where the land revenue includes the zamindar's share, the net demand is entered, and the table states the payments due by the zamindars to Government, and not those due by raiyats to the zamindars. The actual realisable demand on account of the year is entered after excluding arrears for past years. This column includes all the heads classed as "Land Revenue" in the Civil Accounts. The heads are:—(1) ordinary revenue comprising fixed collections, revenue from canals in Sind, fluctuating collections (including nazaranas), over collections (Bombay), surplus collections, collections from Government estates, kyan tax (Burma); (2) sale of Government estates; (3) sale proceeds of waste lands, and redemption of land tax; (4) redemption of summary settlement cess; (5) moturpha (house tax) collections; (6) assessment of alienated lands less quit rent; (7) recoveries on account of survey and settlement charges (Bengal); (8) rents, etc., of fisheries; (9) receipts for the improvement of Government estates; (10) 12 per cent on collections from Government estates (Bengal); and (11) miscellaneous, comprising receipts on account of land registration fees, receipts from quarries and minor mineral products in forests and lands not under the management of the Forest Department, water mills rent, hucoba tax (Sind), malikana or allowances to excluded proprietors, fines and forfeitures of revenue Courts (except in Bengal and Assam), receipts under Madras Act II of 1864, capitation tax (Burma), petroleum well revenue, jade and amber revenue, thatameda tax (Burma), receipts from ruby mines (Burma), recoveries in India of law charges in England on account of appeals from India, miscellaneous receipts, rents of railway class C land and rents of buildings situated on such lands.

Column 6.—The population is that of the last general census.

Entry 8.—As in entry 5, but only ordinary land revenue on fully assessed areas is entered.

Entry 9.—To be entry 8, divided by entry 4 (a).

Entry 10.—To be entry 8, divided by entry 4 (b).

* No details.

† Includes Rs15,19,026 for Dinajpur for which details are not available.
‡ Includes Rs15,18,959 for Dinajpur for which details are not available.

The table is prepared quinquennially, and the figures were last collected in 1917-18

Column 1.—The following classification of estates has been adopted:—

- (1) *Zamindari (permanently settled)* including estates managed for proprietors by Government.
(2) *Zamindari (temporarily settled)* comprising (a) all temporarily settled estates, namely, those settled for periods with proprietors and estates leased to farmers for periods; and (b) all estates owned by Government as proprietor.

Column 4 (b) includes in certain cases fully assessed current fallows.

Column 5 includes all the items falling under the head "Land Revenue" in the Civil Accounts.

Land revenue assessed on fully assessed area [col. 4(a)].	INCIDENCE PER ACRE OF LAND REVENUE (COL. 8) ON FULLY ASSESSED AREA (COL. 4)		Population of fully assessed area. The table is prepared quinquennially. The figures were last collected in 1918-19

Column 3 (a).—In the case of raiyatwari tracts this column states the area of unoccupied assessed lands, of all unassessed poramboles, of minor inam lands in Government villages held rent-free or subject to quit-rent, and of forest lands, excluding portions of the first mentioned two classes occupied under "miscellaneous"; and in the case of zamindari tracts the areas of hills, poramboles, and minor inams are entered. The entire area of whole inam villages is deducted from this column.

Column 3 (b).—Raiyatwari; includes the area of certain Agency tracts in Ganjam, Vizagapatam, and Godavari, and also the difference between the area by professional survey and the area according to village papers.

Column 4 (a).—The figures for the raiyatwari tenures in this column are taken from village papers which differ in some cases from the resultant of preceding columns.

Column 4 (a).—Raiyatwari; states the total occupied area as stated in village papers

Column 4 (b).—For certain districts areas actually cultivated and for certain others estimates, or actuals supplemented by estimates, are shown in this column

Column 5 includes all the items falling under the head "Land Revenue" in the Civil Accounts

Column 8.—Shows only the "ordinary revenue," as defined in the Civil Accounts, on area fully assessed

Column 10.—The cultivated area is, in the case of raiyatwari and zamindari lands, the net cropped area out of the area given in column 4 (a)

Column 11 states the entire population of raiyatwari and zamindari villages, respectively

GRAND TOTAL								

This return is prepared quinquennially

Column 1.—Land held under special tenures, such as talukdari, melwasi, udhad-jamabandi, nardadari, and bhagdari in Gujarat and kheta and izafat in the Konkan, are classed as "zamindari and village communities (temporarily settled)"

Column 3 (a) includes alienated area and the area held free of revenue or the revenue of which has been reduced by special agreement, and also the fully assessed unoccupied area

Column 3 (b) includes alienated cultivated and zamindari cultivated (estimated) land

Column 4 includes land under temporary cultivation, also pot inams paying full assessment

Column 5 states ordinary and miscellaneous land revenue appearing in the Civil Accounts. On the average of the last five years about 2½ percent of the total revenue entered in this column was allotted on account of unoccupied lands, short crops, etc.

Column 10.—The incidence is calculated from the occupied area, which, in the Presidency proper, is treated as the cultivated area for the purposes of this table, and the assessment on that area.

Column 11 includes population of pôt infams and the like scattered areas, which cannot be distinguished from the population of the fully assessed area.

Column 12.—The incidence is based on the figures given in column 11 and those in column 8, plus the amount of full assessment on privileged lands held in fully assessed villages at less than that assessment.

 Column 4 excludes fallows and fully assessed unoccupied area [see note to column 3]
 Column 5 states ordinary and miscellaneous land revenue appearing in the Civil Accounts. On the average of the last five years 6·3 per cent of the total revenue entered in this column was remitted on account of unoccupied lands, short crops, etc.
North-West Frontier { Column 3 (a) and 3 (b) include villages receiving frontier remissions and istamari tenures
 Column 4 (b) includes fully assessed current fallows which bore any crop in the preceding year
 Column 5 shows all the items falling under the head "Land Revenue" in the Civil Accounts, including assigned revenue

The table is prepared quinquennially, and the figures were last collected in 1916-17
Columns 3 (a) and 3 (b) exclude small revenue-free plots, for which details are not forthcoming
Column 5 states (1) "ordinary revenue," comprising (a) fixed collections (including land revenue on account of resumed Gairat Jagirs), (b) fluctuating collection, (c) surplus collections, (d) collections from Government estates (including collections from Dudhi, Tatal, and Bhabar Estates, and receipt from Forest Estates); (2) sale of Government estates; (3) sale-proceeds of waste lands and redemption of land tax; (4) miscellaneous, comprising (a) receipt from quarries and mineral products in forest and land not under the management of the Forest Department; (b) water mills rent, (c) malikharas or allowance to excluded proprietors, (d) fines and forfeitures of Revenue court, (e) recoveries in India of L. charges in England on account of appeals from India, (f) miscellaneous receipts (Revenue Record Room); (ii) mutation fees, (iii) mutation fines, (iv) sale of waste paper, (v) Partition fees, (g) Rents of Railway class "C" land and rents of buildings situated on such land. On the average of the last five years about 1·68 per cent of the total revenue entered in this column was remitted on account of uncultivated lands, short crops, etc.
Column 6.—The total population of the province includes the population of the Benares State

Note.—No figures have been entered in columns 8 to 12 opposite "Lucknow, permanently settled," (page 297) as no portion of the permanently settled area has been fully assessed to land revenue.

Column 11 includes population of revenue-free lands when the area of such lands is less than an entire village. The inclusion does not materially affect the incidence entered in column 12.

Columns 13 and 14.—The figures are taken from the Census Reports of 1911.

GRAND TOTAL		1,770,921	154,321	...	1,616,600	315,105	3,48,885	495,271

Note.—The table is prepared quinquennially, and the figures were last collected in 1916-16, but some of the figures were revised in 1918-19 and also in 1919-20. The tenure in Ajmer-Merwara is all zamindari, and includes village communities in the case of temporarily settled areas

Column 1.—The khalsa area has been classed as "Zamindari and village communities (temporarily settled)" and the jagir and istanadri areas as "Zamindari (permanently settled)"

Column 4 includes in the case of the khalsa villages the assessed cultivated area, including assessed fallow.

Column 5 states ordinary and miscellaneous land revenue appearing in the Civil Accounts

1 Included under Ajmer

	Miscellaneous revenue	2,203		

The table is prepared quinquennially, and the figures were last collected in 1917

Column 1.—The following classification of estates has been adopted:—

(1) *Zamindari (permanently settled)* including estates managed for proprietors by Government;

(2) *Zamindari (temporarily settled)* comprising (a) all temporarily settled estates, namely, those settled for periods with proprietors, and estates leased to farmers for periods and (b) all estates owned by Government as proprietor

Column 5 includes all the items falling under the head "Land Revenue" in the Civil Accounts. On the average of the last five years about 9.16 per cent of the total revenue entered in this column was remitted on account of unoccupied lands, short crops, etc.

Land revenue assessed on fully assessed area (col. 4 (a))	INCIDENCE PER ACRE OF LAND REVENUE (COL. 8) ON FULLY ASSESSED AREA (COL. 4)		Population of fully assessed area	Land revenue assessment per head of population of fully assessed area (cols. 8 and 11)	TOWNS OF OVER 10,000 INHABITANTS		DISTRICT AND NATURE OF TENURE

Note.—For tracts outside the surveyed area the figures are mostly based on estimates. For the omission of the Ruby Mines District and change in the area of the Katha District, see footnotes on page 31.

Column 1.—No areas are classed as zamindari, as no system of communal assessment prevails.

Column 3 (a) shows grants under Appendices I and II of the Rules under the Upper Burma Land and Revenue Regulation.

Column 3 (b) includes non-State lands in districts where no land revenue rates are yet imposed and where the *thathameda* rates have not yet been adjusted.

Column 4 (a) shows figures of State and non-State lands assessed to land revenue, including current fallows which are not assessed to land revenue. This column also includes the areas of waste land grants of which the rates have been fixed in perpetuity.

Column 5 states ordinary land revenue *thathameda*, water rate, rents of fisheries, and items under "Miscellaneous Land Revenue," such as, petroleum, rubies, and other minerals appearing in the Civil Accounts.

Column 1—Raiyatwari includes, besides raiyatwari tenures, all unsettled Government waste and forest lands and areas in which house tax or poll-tax is levied; it also includes certain temporarily settled estates in Sylhet which were formerly (before 1902-03) included under Zamindari (temporarily settled). Zamindari (temporarily settled) includes, besides temporarily settled Zamindari estates, fee-simple grants, wholly or partial revenue free tenures, and grants under progressive assessment.

Column 5 includes all the items falling under the head "Land Revenue" in the Civil Accounts.

Land revenue assessed on fully assessed area [col. 4(a)]	INCIDENCE PER ACRE OF LAND REVENUE (COL. 8) ON FULLY ASSESSED AREA (COL. 4)		Population of fully assessed area	Land revenue assessment per head of population of fully assessed area (cols. 8 and 11)	TOWNS OF OVER 10,000 INHABITANTS		DISTRICT AND NATURE OF TENURE

APPENDICES

APPENDIX A

THE AVERAGE YIELD PER ACRE OF PRINCIPAL CROPS IN INDIA

A provisional return of the yield of principal crops cultivated in India was first compiled in 1892, from various statistical publications available at the time, such as agricultural and settlement reports, crop forecasts, gazetteers, replies to the enquiries of the Famine Commission, etc. To provide for the periodical revision of the estimates a system of experimental crop cuttings was prescribed by the Government of India, the results of which are reported by Local Governments and Administrations at the close of each quinquennium. The returns for the quinquennium ended 31st March 1917 have been received and scrutinised. These outturns per acre are of extreme importance since these will generally be used during the present quinquennium (i.e., until 31st March 1922) in estimating the production of crops, for which forecasts are prepared.

2. The estimates are prepared in the following way. The estimate given is the average outturn on average soil in a year of average character, as deduced from the information obtained from experiments made during the period under review. When, therefore, this average is multiplied by the average area sown, it is believed to give as near an approximation as possible to the outturn of the crop in an *average* year. The Department of Agriculture or Land Records of each province has at its disposal provisional standard estimates of the average yield of land of average quality (usually under the two major heads of irrigated and unirrigated land) for the several crops in each district. The object of the experiments or investigations annually made is to test the accuracy of these estimates, and to enable the head of the Department in each province to revise his provincial estimates when necessary. Should it happen that the period has been one of unfavourable conditions or of exceptionally favourable conditions, which have affected the experiments reported, this would not necessarily involve the reduction or increase of the standard estimates for the district or for the province, unless there were other reasons for believing that, as estimates of average yield in an average year, they had been pitched too high or too low.

3. In 1913, on an examination of the returns of the quinquennium ending 1911-12, it was recognised that the results of experiments as conducted by the district revenue staff were generally unreliable. A change was accordingly made in the system. In 1915 the Government of India, in order to improve the returns, issued instructions to employ, as far as possible, the expert officers of the provincial Agricultural Department, for carrying out experiments on a well-ordered plan in each agricultural tract, and for the investigation of average crop outturns in the various provinces. It appears from the provincial reports that during the quinquennium under review experiments were regularly conducted by officers of the Agricultural Department in Madras, Bombay, and the United Provinces. In Bihar and Orissa crop tests by officers of the Agricultural Department were carried out on a small scale (as an experimental measure only) in a few districts. In Bengal the work was transferred from the district staff to the Agricultural Department, but owing to a reduction in the staff of the Department in consequence of financial stringency, the old system had to be reverted to. In the Punjab officers of the Agricultural Department were consulted in revising the standards, and it is stated that an improved system of conducting experiments has come into force from 1917. In Burma also new rules have been issued entrusting supervision of the experiments very largely to the Agricultural Department with effect from 1917-18. In Assam experiments were conducted according to revised rules framed in 1912 and slightly modified in 1915. In Mysore a system of checking the estimates by the results of experiments conducted by the Agricultural Department is, it is understood, to be introduced during the next quinquennium. No change in the system appears to have been made or contemplated in the remaining provinces.

4. It will thus be seen that in the majority of provinces, the orders of 1915 could not be fully carried out in the quinquennium under review. As a result of the experiments that were made, whether under the old or the new system, considerable changes have been made in the averages previously adopted, except in Bombay, Bihar and Orissa, and the Central Provinces and Berar. The changes

are generally in an upward direction. In Bengal the yield of winter rice has been raised from 983 to 1,036 lbs, and that of jute from 1,271 to 1,300 lbs. Barley in the United Provinces has been raised from 1,100 to 1,150 lbs, arhar from 750 to 800 lbs, and cotton from 160 to 170 lbs. In the Punjab wheat has been raised from 726 to 791 lbs, sugarcane from 1,686 to 1,933 lbs, and cotton from 118 to 135 lbs. Cotton in Sind has been raised from 125 to 170 lbs, and sugarcane from 4,233 to 8,142 lbs. In Assam the yield of autumn rice has been raised from 672 to 706 lbs, and that of sugarcane from 1,904 to 2,016 lbs. In the North-West Frontier Province wheat has been raised from 633 to 676 lbs, and sugarcane from 2,430 to 2,660 lbs. In a few instances the standards have been decreased. In Sind the yield of rapeseed has been put at 393 lbs; in Assam the yield of winter rice at 952 lbs, while the yield of jowar in the North-West Frontier Province is now estimated at 399 lbs.

5. The importance of accurate standards of average outturn cannot be exaggerated, since, as already noted, under the present system the estimates of yield in crop reports are based on these standards, and a small error of even one lb per acre may make a difference of thousands of tons in the estimated yield of a province. It has also to be remembered that the result of a single experiment, if not conducted with proper care, may vitiate the average for the district as well as for the province, since the district figure is calculated by averaging the outturns obtained from all the selected experiments in the district, and the provincial average is estimated by multiplying each district outturn by the area under the crop in each district and dividing the sum of the total outturns thus arrived at by the total area under the crop in the province. It is, therefore, extremely necessary that the instructions issued by the Government of India in 1915, referred to above, should be carried out to the fullest extent, as early as possible, where this has not already been done.

6. The statement below compares the average outturns of the major crops in the different provinces. The relative importance of each province in respect of each crop has also been shown by percentages representing the proportion of the total area under each crop in British India cultivated in each province. Tea has been included in this statement, although this crop is not dealt with in the quinquennial returns, the average outturns having been calculated from the special returns of tea production for the five years ending 1916.

(a) Irrigated. (b) Unirrigated.

The outturns of maize in Assam, of sugarcane in Sind, and of cotton in Ajmer-Merwara appear to be too high, as compared with other provinces, although the areas cultivated are insignificant. On the other hand, the outturns of linseed in the Central Provinces and of sesamum in the Central Provinces and Burma appear to be too low in spite of extensive areas being cultivated with the crops in these provinces.

7. In the following paragraphs the leading features of the provincial reports are summarised :—

Bengal.—In 1915 the work of conducting crop cutting experiments in Bengal was partially transferred from the district offices to the Agricultural Department, but owing, as already noted, to a reduction made in the staff of demonstrators attached to the Agricultural Department in consequence of financial stringency, the old system had to be reverted to. This transfer and retransfer of the work from the district staff to the Agricultural Department and back led to some confusion and resulted in fewer experiments being made in some districts than would otherwise have been undertaken. Nevertheless the total number of experiments made during the quinquennium under review with staple crops (rice, wheat, gram, linseed, rape and mustard, sesamum, sugarcane, and jute) was a record of 3,671, as against 2,814 in the previous quinquennium; and these experiments afforded sufficient data for a general revision of the standards previously adopted for the province. The average yield has been raised in the case of rice, sugarcane, and jute; while it has been reduced in the case of wheat, gram, rape and mustard, and also linseed. The important changes are the increase in the yield of winter rice from 983 to 1,036 lbs, of autumn rice from 807 to 871 lbs, and of jute from 1,271 lbs, to 1,300 lbs, and the reduction of the yield of wheat from 861 to 698 lbs. The returns do not distinguish between irrigated and unirrigated crops, the irrigated area being relatively very small in the province. A few experiments were also made with certain less important crops such as barley, maize, peas, *khesary*, *mung*, sunn hemp, and tobacco; but the data obtained were not sufficient to warrant the deduction of average yields per acre for the whole province.

Madras.—During the quinquennium under review experiments in Madras were conducted by the Agricultural Department, and it is stated that they may be taken as being on the whole more accurate than those conducted in former years by the officers of the Revenue Department. On the other hand, these are much fewer in number and in many cases are too few to admit of the results being accepted as a representative figure for any tract. It is further stated that the figures reported in the previous quinquennial returns, which were solely based on crop cutting experiments, have never been adopted in Madras for the purpose of calculating outturns in crop forecasts, season and crop reports, etc. For this purpose there exists a separate set of standards, which have been fixed and modified from time to time by the Board of Revenue, in consultation with the Director of Agriculture, on a consideration of the tabulated results of crop cutting experiments, the results obtained on Government farms, and, in the case of cotton, of the figures of total crop exported from certain areas. These standard figures have been reported (rightly) in the present return. The Director of Agriculture, however, remarks that these figures are in need of revision in many cases and that he has now under consideration this important question. For the above reason, no useful comparison can be made between the present and the previous figures, especially as a distinction was made between irrigated and unirrigated crops in the previous figures, whereas the present figures are averages for irrigated and unirrigated crops taken together, except in the case of sugarcane which is always an irrigated crop.

Bombay.—In Bombay the estimates of 1897 were prepared with great care, and the results of the experiments made in the two quinquennial ending 1901-02 and 1906-07 were not considered sufficiently reliable to justify any revision. In the quinquennium ending 1911-12, the system of crop cutting experiments conducted by the district staff was abolished, and a system of more scientifically conducted experiments on Government farms by officers of the Agricultural Department was substituted; but the results obtained on Government farms were too meagre to justify any revision of the provincial averages, although a few changes were made with great caution in the district figures. In the quinquennium under review a few changes have been made in the district figures, as a result of the experience gained by the Agricultural Department; and it is believed that the changes are in the right direction, although the matter is largely one of guess work. The only change made in the provincial averages is a very slight increase in the yield of cotton, namely, from 100 to 102 lbs, all other figures remaining unchanged. It is stated

that endeavours will be made during the next quinquennium to test other figures upon which it has not yet been possible to offer any definite opinion.

Sind.—The figures reported from Sind in the previous quinquennia were not the average outturns worked out from the yield of crops raised on different classes of lands and under various modes of irrigation, but were mostly the actual results of individual experiments (or mean figures where more experiments than one were made) by the settlement or divisional officers. The present return has also been prepared from similar data, but a distinction has been made between irrigated and unirrigated crops. The Commissioner remarks that in order to work out correct averages, a large number of experiments would be necessary for each crop under different modes of irrigation, and the aggregate cultivation under each mode of irrigation on different classes of lands would also have to be taken into account; but as these statistics are not yet available on a sufficiently large scale, there is no alternative but to accept the figures now communicated by the collectors. As compared with the previous figures the present estimates show an increase in the case of wheat, barley, gram, sugarcane, and cotton, and a decrease in the case of jowar, bajra, sesamum, and rapeseed. The most important changes are the increase in the average yield of barley from 1,076 to 1,279 lbs., that of gram from 476 to 604 lbs., of sugarcane from 4,233 to 8,142 lbs., and of cotton from 125 to 170 lbs.; and the decrease in the yield of jowar from 1,396 to 866 lbs., of bajra from 971 to 624 lbs., and that of rapeseed from 602 to 393 lbs. The Commissioner states that it is not possible to explain these wide variations except that the increase in the case of sugarcane and cotton can be ascribed to a more regular supply of water following the many improvements in the canals. The figure for sugarcane (8,142 lbs) seems, however, to be extremely high. It is further stated that instructions have been issued to district officers to collect in future the data of outturn of normal (12-anna) crops raised on different classes of irrigation and to work out on a uniform system the average for the district by taking into account the area under each mode of irrigation.

United Provinces.—In the quinquennium under review experiments in the United Provinces were made regularly by officers of the Agricultural Department and some by settlement officers, in addition to those conducted by district officers. The results of these experiments have not necessitated a change in the previous standards except for barley, jowar, arhar, and cotton. The yield of barley has been raised from 1,100 to 1,150 lbs., that of arhar from 750 to 800 lbs., and that of cotton from 160 to 170 lbs. The yield of jowar, on the other hand, has been reduced from 650 to 600 lbs.

Bihar and Orissa.—In accordance with the Government of India Circular of 1915, referred to above, the execution of crop tests by officers of the Agricultural Department of Bihar and Orissa was started in that year as an experimental measure, and experiments were carried out on a small scale in seven districts as supplementary to those conducted by district officers. The crop tests conducted by the Departmental officers are stated to have shown better results than those conducted by district officers; but the information obtained by the small staff of the Department is not yet of sufficient volume to serve as an effective check on the figures returned by district officers. The experiments conducted by district officers, on the other hand, were, as usual, unreliable owing mainly to carelessness in the selection of typical plots, and the results of these experiments do not, therefore, justify any modification of the provisional standards previously adopted for the province on the basis of the estimates of 1892. In the consolidated tables for British India these unrevised standards have therefore been retained in the statement of provincial averages (Table No. 1), but in the detailed statement of district figures, the average outturns based upon the experiments conducted during the quinquennium under review have been shown for each district, irrigated and unirrigated crops being classified separately. The provincial Director remarks that the district officers' figures should be supplemented by the results of a larger number of experiments made by the trained staff of the Agricultural Department under the new system, before the present provincial standards can be safely revised.

Punjab.—The revision of 1912 in the Punjab was made on the basis of the overcautious estimates of settlement officers, and it was remarked

that the yields then fixed were in consequence too low. The results of the experiments made in the quinquennium under review have confirmed that opinion, and in the present revision these yields, as also the cautious estimates of settlement officers, have been regarded as minima. In consultation with district and settlement officers and the Principal of the Agricultural College, Lyallpur, and other officers of the Department of Agriculture, increases have been made where the results of crop experiments indicate that enhancement is required, provided that the number of experiments has been sufficient. The system of conducting crop experiments has been revised and greatly improved, but unfortunately the new system came into force only with the spring harvest of 1917, at least so far as experiments conducted by district officers were concerned. The present revision shows that a general increase in the provincial averages has taken place. The notable increases are in the yield of rice from 688 to 782 lbs, of wheat from 726 to 791 lbs, of barley from 716 to 809 lbs, of maize from 908 to 1,040 lbs, of sugarcane from 1,686 to 1,933 lbs, and of cotton from 118 to 135 lbs. The Punjab Government remarks "that the present normal yields, though possibly slightly on the low side, are fairly reasonable, and that though it is no doubt difficult to determine how far the results of particular crops in particular harvests vary from the normal, the estimates at least for the main crops are steadily becoming accurate."

Burma.—In the quinquennium under review crop cuttings in Burma were as usual carried out for the most part under the supervision of sub-divisional and township officers, with occasional assistance from the Superintendent of Land Records and the subordinate Land Records staff. On a consideration of the results of these experiments and of those made in the previous quinquennium, no change has been made in the previous provincial estimate for rice in Lower Burma: but in the case of Upper Burma the estimates for all the crops now reported exhibit considerable variations. The Director of Agriculture remarks that whatever be the value of the Lower Burma figures, in Upper Burma the number of experiments remains too small to justify confidence in the estimates. In order to show the main products only, the following deductions have, as usual, been made from the gross outturn of the crops, namely, for rice and jowar 33 per cent, and for cotton 70 per cent. The Local Government issued orders in 1916, in accordance with which new rules have been prescribed changing the whole system with effect from 1917-18, and entrusting supervision of the experiments very largely to the Agricultural Department. The results of the new system will be reported in the next return. It may be noted that the average outturns hitherto ascertained by the Director of Agriculture on the basis of crop cutting experiments have never been utilized for the purposes of estimating yields in crop forecasts, season and crop reports, etc., for which there exists a distinct set of normal outturns framed and revised from time to time by the Commissioner of Settlements and Land Records, Burma, mainly on the basis of settlement records. These normal outturns, which are published in the provincial Season and Crop Report, have been shown in the appended Table (No. 8) of district averages underneath the figures of crop cutting experiments reported by the Director of Agriculture, and have also been taken into account in calculating the averages for British India in Table No. 1. It is very desirable that one set of standard outturns should be framed, and revised or verified from time to time, on a consideration of data available from all sources and in consultation with the expert officers of the provincial Agricultural Department.

Central Provinces and Berar.—In the revision of 1912 experiments in the Central Provinces and Berar were selected with great care and due attention was paid to seasonal peculiarities and to classes of soil. In the quinquennium under review, as a result of a large number of experiments made with the rice crop in the Nagpur division slight changes have been made in the figures for that crop for the districts of that division. It has not, however, been considered necessary or advisable to make any change in the provincial averages for any crop.

Assam.—In consequence of the reformation of the province of Assam revised rules for the conduct of crop cuttings were framed in 1912, which were slightly modified in 1915. In accordance with the revised rules experiments were

conducted on all the crops of the province, for which forecasts are made, and also on certain other crops, such as *matikalai* (*phaseolus radiatus*), maize, and potato. The number of experiments made was much larger than in the preceding quinquennium, and their results are stated to have been on the whole satisfactory. The only district in which no experiments were made is the Naga Hills where the staff is stated to be inadequate for the purpose. As a result of the experiments made, the averages have been revised in most cases, the most important changes being the reduction of the yield of winter rice from 1,008 to 952 lbs, and the increase in the yield of autumn rice from 672 to 706 lbs, and that of sugarcane from 1,901 to 2,016 lbs. In the case of cotton a deduction varying between 40 and 50 per cent has been made in order to obtain the yield of lint.

North-West Frontier Province.—In the quinquennium under review experiments in the North-West Frontier Province were made by the district staff (Sub-divisional Officers, Tahsildars, and Naib-Tahsildars) in the two selected districts of Peshawar and Dera Ismail Khan. The results obtained from these experiments have been carefully scrutinized by the Revenue Commissioner, and, in cases where the figures were excessive, especially in Dera Ismail Khan, they have been modified after comparison with the settlement results when the experiments were conducted and worked out under the Settlement Officer's own supervision. For the other districts the averages previously adopted on the basis of experiments framed by Settlement Officers have been repeated. The provincial averages have been raised for all the crops except rice, jowar, and maize. The important changes are the increase in the yield of wheat from 633 to 676 lbs, of barley from 876 to 907 lbs, and of sugarcane from 2,130 to 2,660 lbs, and the reduction of jowar from 436 to 399 lbs.

Ajmer-Merwara.—The figures reported by Ajmer-Merwara are based mainly on the results obtained in 1916-17. The yield of jowar, maize, and cotton has been raised, and that of barley lowered; the most important changes being the increase in the yield of jowar from 137 to 322 lbs, and that of cotton from 170 to 291 lbs. The reported yield of unginned cotton has been reduced by two-thirds to obtain the yield of cleaned cotton (lint), but the figure still appears to be high. It is remarked by the Commissioner that the results of crop experiments, as they are at present conducted in Ajmer-Merwara, are of little, if any, value as a basis for estimating the average yield of any crop on average soil in a year of average character.

Delhi.—The return received from Delhi relates to the new province as constituted in 1912. The reported figures do not call for any special remark.

Coorg.—The only experiments made in Coorg have, as usual, been on rice. The average yield has been slightly lowered from 1,483 to 1,425 lbs, which is still very high in comparison with the reported yield of other provinces. The comparatively high yield of rice in Coorg was ascribed, in the previous return, partly to special attention being paid to rice cultivation since the decline of the coffee industry, and partly to the rice lands of Coorg being watered by hill streams which contain much manurial matter. The slight decrease in the present return is stated to be probably due to the selection of the crop and not to a decline in the productive capacity of the soil or bad years.

Mysore.—As a result of the experiments made in the Mysore State during the quinquennium under review, the averages for all the crops, except sugarcane, have been raised, the most important increases being in the outturns of rice (from 841 to 1,185 lbs), ragi (from 581 to 728 lbs), and cotton (from 79 to 122 lbs). The yield of sugarcane has been reduced from 3,138 to 2,559 lbs. The present figures are based only on experiments conducted by the Revenue Department. It is stated that arrangements have been made for checking the figures by the results of experiments conducted by the Agricultural Department, and the Darbar hope in future to be able to furnish more accurate statistics.

NOTE.—(1) Average yield of both irrigated and unirrigated land is ascertained by multiplying the yield of irrigated land by the irrigated area cropped and the yield of unirrigated land multiplied by the unirrigated area cropped, and dividing the sum of these products by the total area cropped.
(2) The superseded series of the previous quinquennia have been inserted merely to show the trend of the revision made in each period.
* The estimates for Bihar and Orissa are the standards adopted provisionally by the Agricultural Department of the province, which are partly based on the information collected in 1892. The results of the experiments for the period ending 1916-17, as recorded in table No. 6, are not considered sufficiently reliable to justify a revision of the provincial estimates.
† The averages for Burma for 1916-17 are based on the normal outturns per acre given in the Season and Crop Report of Burma for 1916-17.

APPENDIX B

VERNACULAR TERMS USED IN VOLUME I OF AGRICULTURAL
STATISTICS OF INDIA

- Agasi, agali, or avati* (*Sesbania grandiflora*)—A vegetable crop.
- Ajmod* (*Carum Roxburghianum*)—A kind of spice.
- Ajwan* (*Carum copticum*)—A kind of spice, "Bishop's weed."
- Akurkura or jevandi* (*Chrysanthemum coronarium*)—A non-food crop.
- Amada or mamidi allam* (*Curcuma amada*)—A condiment
- Ampazham* (*Spondius magnifera*)—The hog plum.
- Aikar* (*Cajanus indicus*)—The pigeon pea.
- Arunelli* (*Phyllanthus distichus*)—Country star gooseberry.
- Bajra* (*Pennisetum typhoides*)—The spiked millet.
- Bani* (Coorg)—Forest land granted for the service of the holding of rice-fields to which it is allotted, to be held free of revenue for grazing, leaf manure, firewood, and for timber required for the farm.
- Barbati* (*Figna catjang*)—Asparagus, a food grain.
- Barti* (see Wudalu).
- Bel* (*Ægle Marmelos*)—A fruit.
- Bhagdari* (see Naraduri).
- Bilimbi* (*Averrhoa Bilimbi*)—A fruit.
- Bimb* (*Cephalandra indica*)—A fruit.
- Chaplash* (*Artocarpus Chaplasha*)—A tree grown mainly for timber.
- Chayroot* (*Oldenlandia umbellata*)—A dye.
- Cheena* (*Panicum miliaceum*)—The common millet.
- Cheik* (Coorg *lachyma-jobi*)—A food grain, "Job's Tear."
- Chikkudukayulu* (*Dolichos lablab*)—The Indian or papat bean.
- Cholam* (see Jowar).
- Cholanathu* (*Andropogon sorghum*)—Fodder jowar.
- Chowli* (see Barbati).
- Cumbu* (see Bajra).
- Dani* (*Nipa fruticans*)—A polyphagous palm, the leaves of which are used for thatching purposes, also for matting.
- Dhaincha* (*Sesbania aculeata*)—A plant cultivated mainly for green manure.
- Dhatura* (*Datura alba*)—A drug.
- Dividivi* (*Casalpinia coriara*)—A tanning material.
- Gajar*—Carrot.
- Garmal* (*Coleus barbatus*)—A fruit.
- Gondli* (see Kutki).
- Gorait* (United Provinces)—Village watchman.
- Henna* (*Lawsonia alba*)—A dye.
- Indam* (Madras)—Alienated villages or lands granted rent-free. *Whole indam* villages are entire villages held on such tenure; *minor indams* are portions of villages, generally a number of fields, held on *indam* tenure.
- (Coorg)—A grant of land by Government as a reward for services rendered or for religious or charitable purposes.
- Isfagul* (*Plantago ovata*)—A drug.
- Istamrâi* (Punjab, Ajmer-Merwara)—A tenure which, though the revenue is assigned is charged with a permanently fixed quit-rent.
- Izâfat* (Bombay)—A form of service tenure.
- Izâra* (Berar)—Land leased under the waste-land rules on stipulated terms.
- Jagîr* (Berar)—Alienated villages or lands granted as rewards for service either rent-free or on payment of a quit-rent; such lands are hereditary.
- (Ajmer-Merwara)—Land granted revenue-free on condition of military service or as a charitable endowment.
- (Bombay)—Estates held hereditarily or for one or more generations on political considerations, no condition of service being attached to them.
- (Coorg)—Lands granted rent-free (1) to individuals on account of services rendered to the State by themselves or their ancestors, and (2) to some religious institutions.
- Jambo or naval*—Black plum.
- Jamma* (Coorg)—A tenure under which lands are held on half the ordinary assessment on condition that the holders should perform certain services to Government if required, such as escorting Government treasure and rendering assistance to revenue officers on tour. These lands are inalienable without special sanction.

APPENDIX B—continued

VERNACULAR TERMS USED IN VOLUME I OF AGRICULTURAL
STATISTICS OF INDIA—continued

Jenugulu—Asparagus.

Jingili (*Sesamum indicum*)—An oilseed.

Jira—Caraway.

Jodi (Madras)—Portion of the assessment reserved or left unalienated when lands were originally granted on favourable assessment. It is distinguished from quit-rent, which represents an additional charge (generally a certain proportion—one-eighth, one-fourth, one-half, or five-eighths—of the full assessment, *minus* the *jodi*) imposed when the tenures were enfranchised or converted into free-holds.

Jowar (*Sorghum vulgare*)—The great millet.

Kalpayanu—Kidney bean.

Kangni (*Panicum Italicum*)—Italian millet.

Kamranga (*Averrhoa Carambola*)—A fruit.

Kanda (*Dracontium*)—A vegetable crop.

Kankrol (*Momordica cochinchinensis*)—A vegetable crop.

Karola (*Momordica Charantia*)—A vegetable crop.

Karuvapilai (*Murraya Koenigii*)—A condiment.

Kavali (*Sterculia urens*)—The Indian katura, a fruit.

Kavathu (*Dioscorea alata*)—A tuber used as a food stuff.

Khdlsa (Bombay)—Government occupancy or raiyatwari tenure.

—(Central Provinces)—Areas settled on malguzari or thekdari tenure, in contradistinction to zamindari.

—(Berar, Ajmer-Merwara)—Land paying full revenue to Government.

Khatedar (Bihar)—A registered occupant whose name is entered by authority in the Government records as holding unalienated land.

Khiraj (Assam)—Land assessed to full revenue.

Khoti (Bombay)—A form of tenure, found chiefly in the Konkan, the holder of which is, in return for certain semi-proprietary rights, held responsible for payment of assessment on the area held.

Kirni (*Mimusops hexandra*)—A large tree cultivated chiefly in north-western India. It produces an olive-shaped yellow berry which is eaten chiefly during times of scarcity, and in the hot weather.

Kodo or *Kutki* (*Paspalum Scrobiculatum*)—A kind of millet.

Korai—The Indian matting sedge.

Kolinji (*Tephrosia purpurea*)—A drug.

Koorka (*Strobilanthes*)—A vegetable crop.

Kuhudi (*Panicum trypheron*)—A food grain.

Kulthi (*Dolichos biflorus*)—Horse gram.

Kutki (see *Kodo*).

Kwin (Burma)—An area averaging about one square mile selected as a survey unit on account of some natural features or administrative boundaries.

Lakkhiraj (Assam)—Revenue-free land.

Lobia (see *Barbati*).

Madder (*Indigo tinctorum* and *R. cordifolia*)—A dye.

Mahalkari (Bombay)—A revenue and police officer in charge of a sub-division of a taluk.

Makhan sim—The sword bean.

Malguzari (Central Provinces)—A form of tenure, the holder of which is responsible for the payment of the revenue assessed on a village.

Mamlatdar (Bombay)—The chief revenue and police officer (native) in charge of a taluk.

Mankachu (*Alocasia indica*)—A root crop.

Marna (*Eleusine coracana*)—A kind of millet.

Marukholundu (*Artemisia vulgaris*)—The Indian worm wood.

Mehwas (Bombay)—A proprietary tenure assessable to revenue at a lump sum.

Muafi (Munpur)—Any kind of land held revenue-free either for a fixed period or in perpetuity, but the term does not ordinarily apply to jagirs.

Mung (*Phascolus Mungo*)—Green gram.

APPENDIX B—continued

VERNACULAR TERMS USED IN VOLUME I OF AGRICULTURAL
STATISTICS OF INDIA—continued

- Munsarim* (Berar)—A head native revenue officer.
- Narnadari, Bhagdari* (Bombay)—Forms of proprietary tenure involving joint responsibility for the assessment: the revenue in the former case being fixed in the lump and in the latter distributed by rates over fields.
- Neem or Margosa* (*Melia azadirachta*)—A non-food crop.
- Neeroli* (*Gynocordia odorata*)—An oilseed.
- Nela mulaka* (*Solanum xanthocarpum*)—The bogoda brinjal, a drug.
- Nisfkhiraj* (Assam)—Land liable to pay half the revenue which is ordinarily payable for the term of settlement.
- Odamula* (*Ochlandra Rheedii*)—A reed.
- Ol or zaminland*—The elephant foot, a root crop.
- Palampat* (Berar)—Land held on payment of a quit-rent, but not necessarily hereditary.
- Panchayat* (Bengal)—A committee of five respectable persons nominated or appointed by local officers of Government in a village or group of villages for the settlement of petty disputes among the people and for dealing with other small local matters, such as caste, occupation, sanitation, etc.
- Papay* (*Carica papaya*)—A fruit.
- Parpattigar* (Coorg)—A revenue officer in charge of a sub-division of a taluk.
- Parvar* (see Patol).
- Patel* (Coorg)—Village headman appointed by Government.
- Patol* (*Trichosanthes dioica*)—A vegetable crop.
- Peshkash* (Madras)—The fixed land revenue payable to Government on all permanently-settled estates.
- Pinakottai or pouna*—The mast wood.
- Ponnagantikura* (*Alternanthera sesilis*)—A vegetable crop.
- Poramboke* (Madras)—Lands reserved for public or village communal purposes.
- Pot namis* (Bombay)—Lands sub-alienated in alienated villages.
- Pot kharab* (Berar)—The unculturable area included in a survey number.
- Puliyavara* (*Oxalis corniculata*)—A vegetable crop.
- Ragi* (see Mann).
- Randhuni* (see Ajmud).
- Rayatwari*—State lands leased to cultivators for a fixed term. A form of tenure in which the settlement of revenue is made by Government with each individual occupant or cultivator of the land for a given term, without the intervention of a third party.
- Sabai grass* (*Ischaemum Augustifolium*)—A fibre plant.
- Sank-alu* (*Pachyrhizus angulatus*)—A root crop.
- Sapodilla* (*Lichras Sapota*)—A fruit.
- Sebestan* (*Cordia Myxa*)—A fruit.
- Shanbóg* (Coorg)—A village accountant appointed by Government.
- Shrotriem* (Madras)—Village held on grant (originally to Brahmins), wholly or partially revenue-free.
- Siri's tree or vagai* (*Albizia Lebbel*)—A non-food crop.
- Sorrell* (*Rumex vesicarius*)—A vegetable crop.
- Sother*—Radish.
- Swank* (*Panicum frumentaceum*)—A food grain.
- Talukdari* (Bombay)—A form of proprietary right in force in the northern districts of Bombay.
- Tejpat* (*Cinnamomum Tamala* and *C. obtusifolium*)—A spice.
- Thathameda* (Upper Burma)—Household tax.
- Thattan payara* (see Barhati).
- Thekadar* (Central Provinces)—A farmer, a leaseholder, a middleman; one who receives the rents from the cultivators and pays a stipulated sum to the proprietor.
- T'betke grass* (*Imperata arundinacea*)—A small perennial grass used chiefly for thatching purposes.
- Thugyi* (Burma)—A village headman.

APPENDIX B—*concluded*VERNACULAR TERMS USED IN VOLUME I OF AGRICULTURAL
STATISTICS OF INDIA—*concluded*

Til (*Sesamum indicum*).—An oilseed.

Uchhe (*Momordica muricata*).—A vegetable crop.

Jāri (*Acacia eburnea*).—A thorny tree used as fuel or for fencing purposes.

Udhad-jamabandi (Bombay).—A proprietary tenure subject to fixed assessment.

Umblī (Coorg).—Lands granted on reduced rates to individuals on account of services rendered to the State by themselves or their ancestors.

Unda (*Pongamia glabra*).—An oil seed.

Urad (*Phaseolus radiatus*).—Black gram.

Wudalu or barti (*Panicum flavidum*).—A food grain.

Zamindar.—The holder of an estate on a fixed assessment under a deed of permanent ownership granted by Government.

——— (Central Provinces).—A chief of minor importance who, while usually holding a large and compact estate on privileged tenure, has been restricted to the rank of an ordinary subject.

Zamindari.—An estate held on a fixed assessment under a deed of permanent ownership granted by Government.

——— (United Provinces).—An undivided estate held in joint tenure.

Carob or Locust tree	<i>Ceratonia Siliqua</i> . . .	39. Fodder crops.
Carrot or Gajar	<i>Daucus Carota</i> . . .	40. Fruits and Vegetables including root crops.
Cashew nut	<i>Anacardium occidentale</i> . . .	40. „ „ „
Cassava	<i>Manihot utilisima</i> and <i>M. palmata</i> . . .	40. „ „ „
Castor	<i>Ricinus communis</i> . . .	17. Castor.
Cauliflower	<i>Brassica oleracea</i> . . .	40. Fruits and Vegetables including root crops.
Celery	<i>Apium graveolens</i> . . .	40. „ „ „
Chaplash (<i>see</i> Sam tree)
Chayroot	<i>Oldenlandia umbellata</i> . . .	30. Dyes and Tanning Materials—others.
Cheena (<i>see</i> Millet)
Cheik (<i>see</i> Job's Tear)
Chicory	<i>Cichorium Intybus</i> . . .	40. Fruits and Vegetables including root crops.
Chickling Vetch (<i>see</i> Vetch)
Chillies	<i>Capsicum sp.</i> . . .	20. Condiments and spices.
Chikkudukayalu (<i>see</i> Beans, Indian)
Cholum (<i>see</i> Millet)
Cholanathu (fodder Cholum)	<i>Andropogon Sorghum</i> . . .	39. Fodder crops.
Chowli (<i>see</i> Barbati)
Chrysanthemum, Akurkura, or Jovandi	<i>Chrysanthemum corona- rium</i> . . .	42. Miscellaneous non-food crops.
Cinchona	<i>Cinchona sp.</i> . . .	35. Cinchona.
Cinnamon	<i>Cinnamomum zeylanicum</i> . . .	20. Condiments and spices.
Citron or lime or lemon	<i>Citrus medica</i> . . .	40. Fruits and Vegetables including root crops.
Cloves	<i>Eugenia caryophyllata</i> or <i>Caryophyllus aromaticus</i> . . .	20. Condiments and spices.
Coconut	<i>Cocos nucifera</i> . . .	16. Coconut.
Coffee	<i>Coffea arabica</i> . . .	32. Coffee.
Coriander	<i>Coriandrum sativum</i> . . .	20. Condiments and spices.
Cotton	<i>Gossypium sp.</i> . . .	23. Cotton.
Cress	<i>Lepidium sativum</i> . . .	40. Fruits and Vegetables including root crops.
Cucumber	<i>Cucumis sativus</i> . . .	40. „ „ „
Cumbu (<i>see</i> Millet)
Cumin	<i>Cuminum Cyminum</i> . . .	20. Condiments and spices.
Custard Apple (<i>see</i> Apple)
Dani	<i>Nipa fruticans</i> . . .	42. Miscellaneous non-food crops.
Date palm (<i>see</i> Palm)
Dhaincha	<i>Sesbania aculeata</i> . . .	42. Miscellaneous non-food crops.
Dhatura	<i>Datura alba</i> . . .	37. Drugs and Narcotics— others.
Dill or Sowa	<i>Peucedanum graveolens</i> . . .	18. Oilseeds—others.
Dividivi	<i>Cassalpinia coriara</i> . . .	30. Dyes and Tanning Materials—others.
Drumsticks or Horse-radish	<i>Moringa pterygosperma</i> . . .	40. Fruits and Vegetables including root crops.
Elephant foot, Zaminkand or Ol	<i>Amorphophallus campanu- latus</i> . . .	40. „ „ „
Elephant yam	<i>Tryphonium trilobatum</i> . . .	40. „ „ „
Fennel	<i>Foeniculum vulgare</i> . . .	20. Condiments and spices.

English or Vernacular	Botanical	
Jujube	Zizyphus Jujuba . . .	40. Fruits and Vegetables including root crops.
Jute	Corchorus sp.	24. Jute.
Kachu or Kachalu (<i>see</i> Arum)
Kakri (<i>see</i> Melon)
Kalparyu (<i>see</i> Beans, Kidney)
Kamranga	Aterrhoa Carambola . . .	40. Fruits and Vegetables including root crops.
Kanda	Dracontium	40. " "
Kangni (<i>see</i> Nilot)
Kankrol	Momordica cochinchinensis	40. Fruits and Vegetables including root crops.
Kaon (<i>see</i> Millet)
Kapok	Eriodendron anfractuosum .	25. Fibres—others.
Karola	Momordica Charantia . . .	40. Fruits and Vegetables including root crops.
Karuvapilai	Murraya Koenigii	20. Condiments and spices.
Kavali or Indian Katura	Sterculia urens	40. Fruits and Vegetables including root crops.
Kavathu, pannikkavathu, pallakavathu, kolkavathu	Dioscorea alata	40. " " " "
Kharbuja (<i>see</i> Melon)
Khesari (<i>see</i> Vetch)
Khurfa (<i>see</i> Puralano)
Kidney bean (<i>see</i> Bean)
Kirni	Mimusops hexandra . . .	41. Miscellaneous food crops.
Kodo (<i>see</i> Millet)
Korai (<i>see</i> Matting sedgo, Indian)
Kokam (<i>see</i> Mangosteen)
Kolinji or rompali	Tephrosia purpurea . . .	37. Drugs and Narcotics— others.
Koorika	Strobilanthes	40. Fruits and Vegetables including root crops.
Kuhudi	Panicum trypheron . . .	10. Other food grains, etc.
Kulthi (<i>see</i> Gram)
Kutki (<i>see</i> Millet)
Lemon (<i>see</i> Citron)
Lentils	Lens esculenta or Ervam lens	10. Other food grains, etc.
Lettuce	Lactuca Scariola	40. Fruits and Vegetables including root crops.
Lime (<i>see</i> Citron)
Linseed	Linum usitatissimum . . .	12. Linseed.
Lobia (<i>see</i> Barbat)
Locust tree (<i>see</i> Carob)
Lucerne	Medicago sativa	39. Fodder crops.
Madder	Rubia tinctorum and R. cordifolia.	30. Dyes and Tanning Materials—others.
Mahua	Bassia latifolia and B. lon- gifolia.	41. Miscellaneous food crops.
Maize	Zea Mays	8. Maize.
Makhan Sim (<i>see</i> Beans, Sword)
Mango	Mangifera indica	40. Fruits and Vegetables including root crops.
Mangosteen or Kokam	Garcinia indica	40. " " "
Mankachu	Alocasia indica	40. " " "
Margosa or Neem tree	Melia azadirachta	42. Miscellaneous non-food crops.
Marians	Bouea burmanica	40. Fruits and Vegetables including root crops.
Marjoram	Origanum vulgare	20. Condiments and spices.
Marua (<i>see</i> Millet)
Marukkolundu or Indian wormwood	Artemisia vulgaris . . .	42. Miscellaneous non-food crops.

APPENDIX C—continued

ALPHABETICAL LIST OF CROPS—contd.

English or Vernacular	Botanical	
Mast wood	<i>Calophyllum inophyllum</i> .	18. Oilseeds—others.
Mati kalai (<i>see</i> Black gram)
Matting sedge, Indian or Korni	<i>Cyperus corymbosus</i> , C. tegelum.	25. Fibres—others.
Medlar, Indian	<i>Vangueria edulis</i> .	40. Fruits and Vegetables including root crops.
Melon, Kharbuja	<i>Cucumis Melo</i> .	40. " " "
" Kakri	<i>Cucumis Melo</i> var. <i>momor-</i> <i>dica</i>	40. " " "
" Musk	<i>Cucurbita moschata</i> .	40. " " "
" Water	<i>Citrullus vulgaris</i> .	40. " " "
" White Gourd (<i>see</i> Gourd)
Metha (<i>Fenugreek</i>)	<i>Trigonella foenum-græcum</i>	20. Condiments and spices.
Millet, Buluhsh, Bajra or Cumbu	<i>Pennisetum typhoides</i> .	6. Cumbu or Bjara.
(<i>Sorghum</i>) or jowar or cholam	<i>Sorghum vulgare</i> .	5. Cholam or Jowar.
" Italian, Kangni, or Kaon	<i>Panicum Italicum</i> or <i>Setaria italica</i>	10. Other food grains, etc.
" Kodo or Vairagu	<i>Paspalum scrobiculatum</i> .	10. " " "
" Little, Kutki, or Gondli	<i>Panicum miliare</i> .	10. " " "
" Marua or Ragi	<i>Lhusine Coracana</i> .	7. Ragi or maun.
" Common or Cheena	<i>Panicum miliareum</i> .	10. Other food grains, etc.
Mint or Pudina	<i>Mentha arvensis</i> .	20. Condiments and spices.
Morinda or Al	<i>Morinda tinctoria</i> .	30. Dyes and Tanning Materials—others.
Moth (<i>see</i> Bean)
Mulberry	<i>Morus indica</i> .	42. Miscellaneous non-food crops.
Mung (<i>see</i> Gram)
Mustard	<i>Brassica</i> sp. .	14. Rape and Mustard.
Naval (<i>see</i> Plum, black)
Neem tree (<i>see</i> Margosa)
Neerali	<i>Gynocordia odorata</i> .	18. Oilseeds—others.
Niger Seed or Soiguja	<i>Guizotia abyssinica</i> .	18. Oilseeds—others.
Nutmeg	<i>Myristica fragrans</i> .	20. Condiments and spices.
Oats	<i>Avena sativa</i> .	30. Todder crops.
Odumula (reeds)	<i>Ochlandra Rheedii</i> .	42. Miscellaneous non-food crops.
Ol (<i>see</i> Elephant foot)
Onion	<i>Allium Ceba</i> .	20. Condiments and spices.
Opium	<i>Papaver somniferum</i> .	31. Opium.
Orache, garden (<i>see</i> spinach)
Oranges	<i>Citrus Aurantium</i> .	10. Fruits and Vegetables including root crops.
Palm, Date	<i>Phoenix sylvestris</i> .	22. Sugar—others.
" Palmyra	<i>Borassus flabellifer</i> .	22. " " "
Papay	<i>Carica papaya</i> .	40. Fruits and Vegetables including root crops.
Parvar or Patol	<i>Trichosanthes dioica</i> .	10. " " "
Peach	<i>Prunus persica</i> .	40. " " "
Peas	<i>Pisum sativum</i> or <i>Pisum</i> <i>arvense</i> .	10. Other food grains, etc.
Peanut (<i>see</i> Groundnut)
Pepper	<i>Piper</i> or <i>Capsicum</i> .	20. Condiments and spices.
" Black	<i>Piper nigrum</i> .	20. " " "
" Long	<i>Piper longum</i> .	20. " " "
Pigeon or bottle grass	<i>Setaria glauca</i> .	10. Other food grains, etc.
Pigeon pea (<i>see</i> Arhar)
Pimakottai, Pouna (<i>see</i> Mastwood)
Pine apple	<i>Ananas sativa</i> .	40. Fruits and Vegetables including root crops.
Plantain	<i>Musa sapientum</i> .	40. " " "
Plum, black, Jambo tree or Naval	<i>Engenia Jambolana</i> .	40. " " "
" Hog, or Ampazham	<i>Spondias mangifera</i> .	40. " " "
Poi (<i>see</i> Spinach)

APPENDIX C—continued

ALPHABETICAL LIST OF CROPS—contd.

NAME OF CROP		Heads of classification in Table IV

Pomegranate	<i>Punica granatum</i> . . .	40. Fruits and Vegetables including root crops.
Pomelo	<i>Citrus decumana</i> . . .	40. " " "
Ponnagantikura	<i>Alternanthera sessilis</i> . . .	40. " " "
Potato	<i>Solanum tuberosum</i> . . .	40. " " "
" Sweet	<i>Ipomoea Batatas, Batatas edulis.</i>	40. " " "
Pudina (<i>see</i> Mint)
Puliyavara	<i>Oxalis corniculata</i> . . .	40. Fruits and Vegetables including root crops.
Pumpkin	<i>Cucurbita pepo</i> . . .	40. " " "
Pumpkin Melon (<i>see</i> Gourd, 10d)
Radish or Sothor	<i>Raphanus sativus</i> . . .	40. Fruits and Vegetables including root crops.
Ragi (<i>see</i> Millet)
Randhuni (<i>see</i> Ajmud)
Rapeseed	<i>Brassica sp.</i> . . .	14. Rape and Mustard.
Raspberry	<i>Rubus lasiocarpus</i> . . .	40. Fruits and Vegetables including root crops.
Rhea	<i>Boehmeria nivea</i> . . .	25. Fibres—others.
Rice	<i>Oryza sativa</i> . . .	2. Rice.
Rose apple (<i>see</i> Apple)
Roselle	<i>Hibiscus subdariffa</i> . . .	40. Fruits and Vegetables including root crops.
Rubber (India)	<i>Hevea brasiliensis, manihot Glaziovii.</i>	12. Miscellaneous non-food crops.
Sabai grass	<i>Ischæmum augustifolium</i> . . .	25. Fibres—others.
Safflower	<i>Carthamus tinctorius</i> . . .	30. Dyes and Tanning Materials—others.
Saffron	<i>Crocus sativus</i> . . .	30. " " "
Sage	<i>Salvia officinalis</i> . . .	20. Condiments and spices.
Sam tree or Chaplash	<i>Artocarpus Chaplasha</i> . . .	42. Miscellaneous non-food crops.
Sank-alu	<i>Pachyrhizus angulatus</i> . . .	40. Fruits and Vegetables including root crops.
Sapodilla	<i>Achras Sapota</i> . . .	40. " " "
Sawan (<i>see</i> Swank)
Sebestan	<i>Cordia myxa</i> . . .	40. Fruits and Vegetables including root crops.
Senna	<i>Cassia angustifolia and C. ovata.</i>	37. Drugs and Narcotics— others.
Sesamum, til or jinjili	<i>Sesamum indicum</i> . . .	13. Sesamum.
Shahjira (<i>see</i> Caraway, black)
Shama (<i>see</i> Swank)
Singhara or water caltrop	<i>Trapa bispinosa</i> . . .	40. Fruits and Vegetables including root crops.
Siris tree or vagai	<i>Albizia Lebbek</i> . . .	42. Miscellaneous non-food crops.
Sisal hemp (<i>see</i> Hemp)
Soapnut or Kumkudu-Kaya	<i>Sapindus trifoliatus</i> . . .	37. Drugs and Narcotics— others.
Sorguja (<i>see</i> Niger seed)
Sorrell	<i>Rumex vesicarius</i> . . .	40. Fruits and Vegetables including root crops.
Sowa (<i>see</i> Dill)
Sothor (<i>see</i> Radish)
Soy bean (<i>see</i> Bean)
Spelt wheat (<i>see</i> Wheat)
Spinach	<i>Spinacea oleracea</i> . . .	40. Fruits and Vegetables including root crops.
" Indian or poi	<i>Basella alba</i> . . .	40. " " "
" Mountain, or Garden Orache	<i>Atriplex hortensis</i> . . .	40. " " "
Strawberry	<i>Fragaria vesca</i> . . .	40. " " "
Sugarcane	<i>Saccharum officinarum</i> . . .	21. Sugarcane.

APPENDIX C—concluded.

ALPHABETICAL LIST OF CROPS—concl'd.

NAME OF CROP		Heads of classification in Table IV
English or Vernacular	Botanical	
Sunflower	<i>Helianthus Annuus</i>	18. Oilseeds—others.
Swallow-wort	<i>Calotropis</i> sp.	25. Fibres—others.
Swank, Sawan, or Shama	<i>Panicum frumentaceum</i>	10. Other food grains, etc.
Sweet flag	<i>Acorus Calamus</i>	37. Drugs and Narcotics— others.
Sweet potato (<i>see</i> Potato)
Tamarind	<i>Tamarindus indica</i>	20. Condiments and spices.
„ Manila	<i>Pithecolobium dulce</i>	40. Fruits and Vegetables including root crops.
Taramia	<i>Eruca sativa</i>	14. Rape and Mustard.
Tea	<i>Camellia Thea</i>	33. Tea.
Tejpat	<i>Cinnamomum Tamala</i> and <i>C. obtusifolium</i> .	20. Condiments and spices.
Tepari (<i>see</i> Gooseberry)
Thattian-payara (<i>see</i> Barbati)
Thetkè (<i>gras</i>)	<i>Imperata arundinacea</i>	12. Miscellaneous non-food crops.
Til (<i>see</i> Sesamum)
Tobacco	<i>Nicotiana Tabacum</i> and <i>N.</i> <i>Rustica</i> .	31. Tobacco.
Tomato	<i>Lycopersicum esculentum</i>	10. Fruits and Vegetables including root crops.
Tori, Toria	<i>Brassica Napus</i>	11. Rape and Mustard.
Turmeric	<i>Curcuma longa</i>	20. Condiments and spices.
Turnip	<i>Brassica Rapa</i>	40. Fruits and Vegetables including root crops.
Uchho	<i>Momordica muricata</i>	40. „ „ „
Udai	<i>Acacia eburnea</i>	12. Miscellaneous non-food crops.
Unda	<i>Pongamia glabra</i>	18. Oilseeds—others.
Urad (<i>see</i> Gram)
Varagu (<i>see</i> Millet)
Vagri (<i>see</i> Siris tree)
Vempali (<i>see</i> Kolinji)
Vetch, Field or gawar	<i>Cyamopsis psoralioidea</i>	30. Fodder crops.
„ Chickling or khesari	<i>Lathyrus sativus</i>	10. Other food grains, etc.
Water caltrop (<i>see</i> Singhara)
„ melon (<i>see</i> Melon)
Wheat	<i>Triticum sativum</i>	3. Wheat.
„ Buck	<i>Pagopyrum esculentum</i>	10. Other food grains, etc.
„ Spelt	<i>Triticum sativum</i> var Spelta.	3. Wheat.
Wood apple (<i>see</i> Apple)
Wudalu or barti	<i>Panicum flavidum</i>	10. Other food grains, etc.
Yams	<i>Dioscorea</i> sp.	10. Fruits and Vegetables including root crops.
Zaminkand (<i>see</i> Elephant foot)
